FemtoDetect™ IFNG (Human) ELISA Kit

Catalog # KA7079 Size 1 Kit

Applications

The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Specification

Product Description	FemtoDetect™ IFNG (Human) ELISA Kit is a sandwich enzyme immunoassay for the quantitative measurement of Human IFN-gamma (Interferon gamma) in serum, plasma and other biological fluids.
Suitable Sample	serum, plasma and other biological fluids
Sample Volume	100 uL
Detection Method	Colorimetric
Assay Type	Quantitative
Calibration Range	1.56-100 pg/mL
Limit of Detection	0.98 pg/mL
Specificity	This kit recognizes Human IFN-gamma in samples.No significant cross-reactivity or interference between Human IFN-gamma and analogues was observed
Regulatory Status	For research use only (RUO)
Quality Control Testing	Standard curve The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Storage Instruction	Store at 2-8°C. For long term storage store at -20°C. Avoid repeated freezing and thawing.

Applications

- Quantification

Gene Info — IFNG

Entrez GeneID	3458
Gene Name	IFNG
Gene Alias	IFG, IFI
Gene Description	interferon, gamma
Omim ID	147570 191100 607948 609135 609423
Gene Ontology	Hyperlink
Gene Summary	Interferon-gamma (IFNG), or type II interferon, is a cytokine critical for innate and adaptive immunity against viral and intracellular bacterial infections and for tumor control. Aberrant IFNG expression is associated with a number of autoinflammatory and autoimmune diseases. The importance of IFNG in the immune system stems in part from its ability to inhibit viral replication directly, but most importantly derives from its immunostimulatory and immunomodulatory effects. IFNG is produced predominantly by natural killer (NK) and natural killer T (NKT) cells as part of the innate immune response, and by CD4 (MIM 186940) and CD8 (see MIM 186910) cytotoxic T lymphocyte (CTL) effector T cells once antigen-specific immunity develops (Schoenborn and Wilson, 2007 [PubMed 17981204]).[supplied by OMIM
Other Designations	-

Pathway

- Allograft rejection
- Cytokine-cytokine receptor interaction
- Graft-versus-host disease
- Jak-STAT signaling pathway
