C-C Motif Chemokine (Hamster) ELISA Kit (Quantitative)

Catalog # KA7377 Size 1 Kit

Applications

Quantification

The standard curve is for the purpose of illustration only and should not be used to calculate unknowns. A standard curve should be generated each time the assay is performed.

Specification

Product Description	C-C Motif Chemokine (Hamster) ELISA Kit is a kit used for the quantitative measurement of C-C Mot if Chemokine in hamster (CHO) biological sample.
Suitable Sample	Tissue Culture Fluids
Size	96 Well
Absorbance (nm)	450/650
Detection Method	Colorimetric
Assay type	Quantitative
Calibration Range	10 to 0.156 ng/mL
Limit of Detection	0.068 ng/mL
Reactivity	Hamster
Regulation Status	For research use only (RUO)
Quality Control Testing	Standard curve
