

MET (phospho Y1234/Y1235) monoclonal antibody, clone 6AT1877

Catalog # MAB0115

Size 400 uL

Applications

Western Blot (Cell lysate)

Detection of endogenous Met in HepG2 cell line. 10 ug/lane of HepG2 cell lysate was used to examine the expression of MET (phospho Y1234/1235) monoclonal antibody, clone 6AT1877 (Cat # MAB0115).

Specification

Product Description	Mouse monoclonal antibody raised against synthetic phosphopeptide of MET.
Immunogen	Synthetic phosphopeptide (conjugated with KLH) corresponding to residues surrounding Y1234/Y1235 of human MET.
Host	Mouse
Reactivity	Human, Mouse
Form	Liquid
Purification	Protein G purification
Isotype	IgG1
Recommend Usage	Western Blot (1:100-500) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS (0.09% sodium azide)

Storage Instruction

Store at 4°C. For long term storage store at -20°C.
Aliquot to avoid repeated freezing and thawing.

Note

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Western Blot (Cell lysate)

Detection of endogenous Met in HepG2 cell line. 10 ug/lane of HepG2 cell lysate was used to examine the expression of MET (phospho Y1234/1235) monoclonal antibody, clone 6AT1877 (Cat # MAB0115).

Gene Info — MET

MET

Gene Alias

AUTS9, HGFR, RCCP2, c-Met

Gene Description

met proto-oncogene (hepatocyte growth factor receptor)

Omim ID[114550](#) [164860](#) [605074](#) [611015](#)**Gene Ontology**[Hyperlink](#)**Gene Summary**

The proto-oncogene MET product is the hepatocyte growth factor receptor and encodes tyrosine-kinase activity. The primary single chain precursor protein is post-translationally cleaved to produce the alpha and beta subunits, which are disulfide linked to form the mature receptor. Various mutations in the MET gene are associated with papillary renal carcinoma. Two transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq]
