## CD63 monoclonal antibody, clone TEA3/18 (FITC)

Catalog # MAB15357 Size 5 x 100 reactions

## Applications

## Flow Cytometry

Flow cytometric analysis of PMA-activated human peripheral blood platelets (blue histogram) and non-activated (red histogram) with CD63 monoclonal antibody, clone TEA3/18 (FITC) (Cat # MAB15357).

Specification	
Product Description	Mouse monoclonal antibody raised against human CD63.
Immunogen	Cell preparation of human cytochrome B enriched cells.
Host	Mouse
Theoretical MW (kDa)	53
Reactivity	Human
Form	Liquid
Conjugation	FITC
Purification	Affinity purification
lsotype	lgG1
Recommend Usage	Flow Cytometry (20 uL/10 <sup>6</sup> cells) The optimal working dilution should be determined by the end user.

😭 Abnova	Product Information
Storage Buffer	In PBS, pH 7.4 (protein stabilizer, 0.09% sodium azide).
Storage Instruction	Store in the dark at 4°C.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

## Applications

• Flow Cytometry

Flow cytometric analysis of PMA-activated human peripheral blood platelets (blue histogram) and non-activated (red histogram) with CD63 monoclonal antibody, clone TEA3/18 (FITC) (Cat # MAB15357).

Gene Info — CD63	
Entrez GenelD	<u>967</u>
Protein Accession#	<u>P08962</u>
Gene Name	CD63
Gene Alias	LAMP-3, ME491, MLA1, OMA81H, TSPAN30
Gene Description	CD63 molecule
Omim ID	<u>155740</u>
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known a s the tetraspanin family. Most of these members are cell-surface proteins that are characterized b y the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. This encoded prot ein is a cell surface glycoprotein that is known to complex with integrins. It may function as a blood platelet activation marker. Deficiency of this protein is associated with Hermansky-Pudlak syndro me. Also this gene has been associated with tumor progression. The use of alternate polyadenyla tion sites has been found for this gene. Alternative splicing results in multiple transcript variants en coding different proteins. [provided by RefSeq
