

CHAF1B monoclonal antibody, clone I15-P (FITC)

Catalog # MAB16018 Size 1000 uL

Applications

Flow Cytometry

Flow cytometric analysis of HEK293 cells with CHAF1B monoclonal antibody, clone I15-P (FITC) (Cat # MAB16018).

Specification

Product Description	Rabbit monoclonal antibody raised against synthetic peptide of human CHAF1B.
Host	Rabbit
Reactivity	Human
Form	Liquid
Conjugation	FITC
Purification	EVAC purification
Isotype	IgG
Recommend Usage	Flow Cytometry The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS (10 mg/mL BSA, 0.05% Sodium Azide).
Storage Instruction	Store in the dark at 4°C. Avoid prolonged exposure to light. Do not freeze.

Note

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Flow Cytometry

Flow cytometric analysis of HEK293 cells with CHAF1B monoclonal antibody, clone I15-P (FITC) (Cat # MAB16018).

Gene Info — CHAF1B

Entrez GeneID [8208](#)

Protein Accession# [Q13112](#)

Gene Name CHAF1B

Gene Alias CAF-1, CAF-IP60, CAF1, CAF1A, CAF1P60, MPHOSPH7, MPP7

Gene Description chromatin assembly factor 1, subunit B (p60)

Omim ID [601245](#)

Gene Ontology [Hyperlink](#)

Gene Summary Chromatin assembly factor I (CAF-I) is required for the assembly of histone octamers onto newly-replicated DNA. CAF-I is composed of three protein subunits, p50, p60, and p150. The protein encoded by this gene corresponds to the p60 subunit and is required for chromatin assembly after replication. The encoded protein is differentially phosphorylated in a cell cycle-dependent manner. In addition, it is normally found in the nucleus except during mitosis, when it is released into the cytoplasm. This protein is a member of the WD-repeat HIR1 family and may also be involved in DNA repair. [provided by RefSeq]
