SELS monoclonal antibody, clone 7F8G1

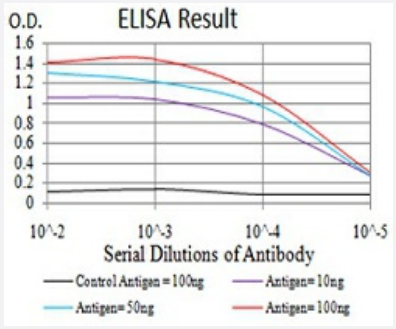

Catalog # MAB17233 Size 100 ug

Applications

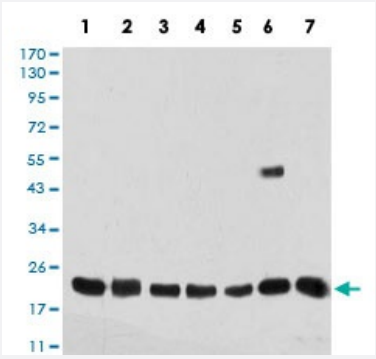

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical staining of paraffin-embedded endometrial cancer tissues with SELS monoclonal antibody.

Enzyme-linked Immunoabsorbent Assay

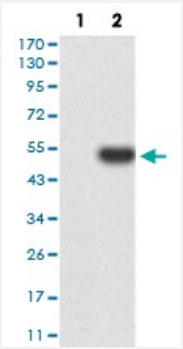

ELISA analysis of SELS monoclonal antibody, clone 7F8G1.

Western Blot (Cell lysate)

Western blot analysis of Lane 1: MCF-7 cell; Lane 2: PANC-1 cell; Lane 3: Jurkat cell; Lane 4: HepG2 cell; Lane 5: MOLT4 cell; Lane 6: U251 cell; Lane 7: A431 cell with SELS monoclonal antibody.

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Western Blot (Transfected lysate)

Western Blot analysis of (1) HEK293 cells, (2) SELS-hIgGFc transfected HEK293 cell lysate.

Specification

Product Description	Mouse monoclonal antibody raised against recombinant human SELS.
Immunogen	Recombinant protein corresponding to amino acid 1-187 of human SELS from *E. coli*.
Host	Mouse
Theoretical MW (kDa)	21.2kDa
Reactivity	Human
Form	Liquid
Isotype	IgG2b
Recommend Usage	ELISA (1:10000) Western Blot (1:500-1:2000) Immunohistochemistry (1:200-1:1000) Immunocytochemistry Flow Cytometry The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS (0.05% sodium azide).
Storage Instruction	Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

  Immunohistochemical staining of paraffin-embedded endometrial cancer tissues with SELS monoclonal antibody.

- Enzyme-linked Immunoabsorbent Assay

  ELISA analysis of SELS monoclonal antibody, clone 7F8G1.

- Western Blot (Cell lysate)

  Western blot analysis of Lane 1: MCF-7 cell; Lane 2: PANC-1 cell; Lane 3: Jurkat cell; Lane 4: HepG2 cell; Lane 5: MOLT4 cell; Lane 6: U251 cell; Lane 7: A431 cell with SELS monoclonal antibody.

- Western Blot (Transfected lysate)

  Western Blot analysis of (1) HEK293 cells, (2) SELS-hIgGFc transfected HEK293 cell lysate.

Gene Info — SELS

Entrez GeneID	55829
Gene Name	SELS
Gene Alias	AD-015, ADO15, MGC104346, MGC2553, SBBI8, SEPS1, VIMP
Gene Description	selenoprotein S
Omim ID	607918
Gene Ontology	Hyperlink
Gene Summary	This gene encodes a selenoprotein, which contains a selenocysteine (Sec) residue at its active si te. The selenocysteine is encoded by the UGA codon that normally signals translation termination. The 3' UTR of selenoprotein genes have a common stem-loop structure, the sec insertion sequen ce (SECIS), that is necessary for the recognition of UGA as a Sec codon rather than as a stop sig nal. Studies suggest that this protein may regulate cytokine production, and thus play a key role in the control of the inflammatory response. Two alternatively spliced transcript variants encoding the same protein have been found for this gene. [provided by RefSeq
Other Designations	VCP-interacting membrane
