

# AKT1 (phospho S473) monoclonal antibody, clone B9

Catalog # MAB18775      Size 200 uL

## Applications

### Western Blot (Cell lysate)

Western Blot analysis of NIH3T3 cell lysate with AKT1 (phospho S473) monoclonal antibody, clone B9 (Cat # MAB18775). Lane 1: treated or Lane 2: untreated with PDGF.

### Flow Cytometry

Flow cytometric analysis of Jurkat cells with AKT1 (phospho S473) monoclonal antibody, clone B9 (Cat # MAB18775). Treated with LY294002 (red) or with 20% FBS (green).

## Specification

|                            |                                                                                      |
|----------------------------|--------------------------------------------------------------------------------------|
| <b>Product Description</b> | Rabbit monoclonal antibody raised against synthetic phosphopeptide of human AKT1.    |
| <b>Immunogen</b>           | A synthetic phosphopeptide corresponding to residues surrounding S473 of human AKT1. |
| <b>Host</b>                | Rabbit                                                                               |
| <b>Reactivity</b>          | Human, Mouse                                                                         |
| <b>Form</b>                | Liquid                                                                               |
| <b>Purification</b>        | Protein A/G purification                                                             |

|                     |                                                                                                                        |
|---------------------|------------------------------------------------------------------------------------------------------------------------|
| Isotype             | IgG1, kappa                                                                                                            |
| Recommend Usage     | Flow Cytometry<br>Western Blot<br>The optimal working dilution should be determined by the end user.                   |
| Storage Buffer      | In PBS, pH 7.4 (50% glycerol, 0.1% BSA and 0.02% sodium azide).                                                        |
| Storage Instruction | Store at -20°C.                                                                                                        |
| Note                | This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |

## Applications

- Western Blot (Cell lysate)

Western Blot analysis of NIH3T3 cell lysate with AKT1 (phospho S473) monoclonal antibody, clone B9 (Cat # MAB18775). Lane 1: treated or Lane 2: untreated with PDGF.

- Flow Cytometry

Flow cytometric analysis of Jurkat cells with AKT1 (phospho S473) monoclonal antibody, clone B9 (Cat # MAB18775). Treated with LY294002 (red) or with 20% FBS (green).

| Gene Summary     | The serine-threonine protein kinase encoded by the AKT1 gene is catalytically inactive in serum-starved primary and immortalized fibroblasts. AKT1 and the related AKT2 are activated by platelet-derived growth factor. The activation is rapid and specific, and it is abrogated by mutations in the pleckstrin homology domain of AKT1. It was shown that the activation occurs through phosphatidylinositol 3-kinase. In the developing nervous system AKT is a critical mediator of growth factor-induced neuronal survival. Survival factors can suppress apoptosis in a transcription-independent manner by activating the serine/threonine kinase AKT1, which then phosphorylates and inactivates components of the apoptotic machinery. Multiple alternatively spliced transcript variants have been found for this gene. [provided by RefSeq] |
