MMP2 monoclonal antibody, clone ADGF-13

Catalog # MAB22013 Size 100 uL

Applications

Western Blot (Cell lysate)

Western Blot (cell lysate) analysis of L6 cell lysate.

Specification

Product Description	Rabbit monoclonal antibody raised against synthetic protein of human MMP2.
Immunogen	A synthetic peptide corresponding to human MMP2.
Host	Rabbit
Reactivity	Human, Mouse, Rat
Form	Liquid
Purification	Affinity purification
Isotype	IgG
Recommend Usage	Immunocytochemistry (1:50-200) Immunofluorescence (1:50-200) Western Blot (1:500-2000) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, 150 mM NaCl, pH 7.4 (50% glycerol, 0.02% sodium azide).

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Storage Instruction	Store at -20°C is stable for one year. It can also be aliquotted and stored frozen at -20°C for a longer time. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Immunofluorescence
- Immunocytochemistry
- Western Blot (Cell lysate)

  Western Blot (cell lysate) analysis of L6 cell lysate.

Gene Info — MMP2

Entrez GeneID	4313
Protein Accession#	P08253
Gene Name	MMP2
Gene Alias	CLG4, CLG4A, MMP-II, MONA, TBE-1
Gene Description	matrix metallopeptidase 2 (gelatinase A, 72kDa gelatinase, 72kDa type IV collagenase)
Omim ID	120360 277950 605156
Gene Ontology	Hyperlink
Gene Summary	Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellul ar matrix in normal physiological processes, such as embryonic development, reproduction, and ti ssue remodeling, as well as in disease processes, such as arthritis and metastasis. Most MMP's are secreted as inactive proproteins which are activated when cleaved by extracellular proteinase s. This gene encodes an enzyme which degrades type IV collagen, the major structural componen t of basement membranes. The enzyme plays a role in endometrial menstrual breakdown, regulati on of vascularization and the inflammatory response. Mutations in this gene have been associate d with Winchester syndrome and Nodulosis-Arthropathy-Osteolysis (NAO) syndrome. Two transcri pt variants encoding different isoforms have been found for this gene. [provided by RefSeq
Other Designations	collagenase type IV-A|matrix metalloproteinase 2|matrix metalloproteinase-II|neutrophil gelatinase
