

EGFR monoclonal antibody, clone SB41a

Catalog # MAB3323 Size 100 ug

Applications

Western Blot (Cell lysate)

HT-29 cell lysate was used with EGFR monoclonal antibody, clone SB41a (Cat # MAB3323) , 1st lane, and Mouse Anti-EGFR-HRP, 2 nd lane. Goat Anti-Mouse IgG2a was used in conjunction with the unlabeled antibody.

Specification

Product Description	Mouse monoclonal antibody raised against recombinant EGFR.
Immunogen	Recombinant protein corresponding to human EGFR.
Host	Mouse
Reactivity	Human
Specificity	human EGFR.
Form	Liquid
Isotype	IgG2a
Recommend Usage	Western Blot (1-2 ug/mL) Immunohistochemistry (10 ug/mL) The optimal working dilution should be determined by the end user.
Storage Buffer	In 100 mM BBS, pH 8.0
Storage Instruction	Store at 4°C.

Applications

- Western Blot (Cell lysate)

HT-29 cell lysate was used with EGFR monoclonal antibody, clone SB41a (Cat # MAB3323) , 1st lane, and Mouse Anti-EGFR-HRP, 2 nd lane. Goat Anti-Mouse IgG2a was used in conjunction with the unlabeled antibody.

- Immunohistochemistry (Frozen sections)

Gene Info — EGFR

Entrez GeneID	1956
Gene Name	EGFR
Gene Alias	ERBB, ERBB1, HER1, PIG61, mENA
Gene Description	epidermal growth factor receptor (erythroblastic leukemia viral (v-erb-b) oncogene homolog, avian)
Omim ID	131550 211980
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene is a transmembrane glycoprotein that is a member of the protein kinase superfamily. This protein is a receptor for members of the epidermal growth factor family. EGFR is a cell surface protein that binds to epidermal growth factor. Binding of the protein to a ligand induces receptor dimerization and tyrosine autophosphorylation and leads to cell proliferation. Mutations in this gene are associated with lung cancer. [provided by RefSeq]
Other Designations	avian erythroblastic leukemia viral (v-erb-b) oncogene homolog cell growth inhibiting protein 40 cell proliferation-inducing protein 61 epidermal growth factor receptor
