

GH1 monoclonal antibody, clone 4/2G7 1C3

Catalog # MAB3682

Size 1 mg

Specification

Product Description	Mouse monoclonal antibody raised against recombinant GH1.
Immunogen	Recombinant protein corresponding to human GH1.
Host	Mouse
Reactivity	Human
Specificity	This antibody recognizes natural and recombinant human GH1.
Form	Liquid
Isotype	IgG2a, kappa
Recommend Usage	The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS
Storage Instruction	Store at 4°C. Aliquot to avoid repeated freezing and thawing.

Applications

- Radioimmunoassay

Gene Info — GH1

Entrez GeneID	2688
Gene Name	GH1
Gene Alias	GH, GH-N, GHN, hGH-N

Gene Description	growth hormone 1
Omim ID	139250 173100 262400 262650 604271
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene is a member of the somatotropin/prolactin family of hormones which play an important role in growth control. The gene, along with four other related genes, is located at the growth hormone locus on chromosome 17 where they are interspersed in the same transcriptional orientation; an arrangement which is thought to have evolved by a series of gene duplications. The five genes share a remarkably high degree of sequence identity. Alternative splicing generates additional isoforms of each of the five growth hormones, leading to further diversity and potential for specialization. This particular family member is expressed in the pituitary but not in placental tissue as is the case for the other four genes in the growth hormone locus. Mutations in or deletions of the gene lead to growth hormone deficiency and short stature. [provided by RefSeq]
Other Designations	pituitary growth hormone
