

CD8A/CD8B monoclonal antibody, clone RFT8 (Cy5)

Catalog # MAB6027 Size 100 Reactions

Specification	
Product Description	Mouse monoclonal antibody raised against native CD8A/CD8B.
Immunogen	Native purified from human thymocytes and E-rosetted lymphocytes.
Host	Mouse
Reactivity	Human
Specificity	Specificity human CD8
Form	Liquid
Conjugation	Cy5
Isotype	lgG1
Recommend Usage	Flow Cytometry (10 ul/10 ⁶ cells) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS (0.09% sodium azide)
Storage Instruction	Store in the dark at 4°C. Do not freeze. Avoid prolonged exposure to light. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Immunohistochemistry (Frozen sections)
- Flow Cytometry

Gene Info — CD8A	
Entrez GenelD	<u>925</u>
Gene Name	CD8A
Gene Alias	CD8, Leu2, MAL, p32
Gene Description	CD8a molecule

Gene Ontology	<u>Hyperlink</u>
Gene Summary	The CD8 antigen is a cell surface glycoprotein found on most cytotoxic T lymphocytes that mediat es efficient cell-cell interactions within the immune system. The CD8 antigen acts as a corepresso r with the T-cell receptor on the T lymphocyte to recognize antigens displayed by an antigen prese nting cell (APC) in the context of class I MHC molecules. The coreceptor functions as either a hom odimer composed of two alpha chains, or as a heterodimer composed of one alpha and one beta chain. Both alpha and beta chains share significant homology to immunoglobulin variable light chains. This gene encodes the CD8 alpha chain isoforms. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq
Other Designations	CD8 antigen alpha polypeptide CD8 antigen, alpha polypeptide (p32) Leu2 T-lymphocyte antigen OKT8 T-cell antigen T cell co-receptor T-cell antigen Leu2 T-cell surface glycoprotein CD8 alpha c hain T-lymphocyte differentiation antigen T8/Leu-2 T8 T-cell ant

Gene Info — CD8B	
Entrez GenelD	926
Gene Name	CD8B
Gene Alias	CD8B1, LYT3, Leu2, Ly3, MGC119115
Gene Description	CD8b molecule

Product Information

Gene Summary

The CD8 antigen is a cell surface glycoprotein found on most cytotoxic T lymphocytes that mediat es efficient cell-cell interactions within the immune system. The CD8 antigen, acting as a corecept or, and the T-cell receptor on the T lymphocyte recognize antigen displayed by an antigen presenting cell (APC) in the context of class I MHC molecules. The functional coreceptor is either a homod imer composed of two alpha chains, or a heterodimer composed of one alpha and one beta chain. Both alpha and beta chains share significant homology to immunoglobulin variable light chains. This gene encodes the CD8 beta chain isoforms. Multiple alternatively spliced transcript variants encoding distinct membrane associated or secreted isoforms have been described. A pseudoge ne, also located on chromosome 2, has been identified. [provided by RefSeq

Other Designations

CD8 antigen, beta polypeptide (p37)|CD8 antigen, beta polypeptide 1 (p37)|CD8b antigen|OTTH UMP00000160761|T lymphocyte surface glycoprotein beta chain|T-cell surface glycoprotein CD8 beta chain

Publication Reference

The CD8 coreceptor revisited: one chain good, two chains better.
