TGFB1 monoclonal antibody, clone 2E6

Catalog # MAB6320 Size 500 ug

Specification

Product Description	Mouse monoclonal antibody raised against native TGFB1.
Immunogen	Native purified human platelets TGFB1.
Host	Mouse
Reactivity	Human
Specificity	This antibody reacts with the dimeric (25 KDa) and monomeric (12.5 KDa) forms of TGFB1 under both non-reducing and reducing conditions respectively.
Form	Lyophilized
Isotype	IgG1, kappa
Recommend Usage	Western Blot (1-10 ng/mL) The optimal working dilution should be determined by the end user.
Storage Buffer	Lyophilized from 10 mM PBS, pH 7.0
Storage Instruction	Store at -20°C. Aliquot after reconstitution to avoid repeated freezing and thawing.

Applications

- Enzyme-linked Immunoabsorbent Assay
- Western Blot

Gene Info — TGFB1

Entrez GeneID	7040

Gene Name	TGFB1
Gene Alias	CED, DPD1, TGFB, TGFbeta
Gene Description	transforming growth factor, beta 1
Omim ID	131300 190180 219700
Gene Ontology	Hyperlink
Gene Summary	TGFB is a multifunctional peptide that controls proliferation, differentiation, and other functions in many cell types. TGFB acts synergistically with TGFA (MIM 190170) in inducing transformation. It also acts as a negative autocrine growth factor. Dysregulation of TGFB activation and signaling may result in apoptosis. Many cells synthesize TGFB and almost all of them have specific receptors for this peptide. TGFB1, TGFB2 (MIM 190220), and TGFB3 (MIM 190230) all function through the same receptor signaling systems.[supplied by OMIM
Other Designations	TGF-beta 1 protein|diaphyseal dysplasia 1, progressive|transforming growth factor-beta 1
