

Bioactive

CCL5 (Human) Recombinant Protein

Catalog # P3664

Size 20 ug

Specification

Product Description	Human CCL5 (P13501, 24 a.a. - 91 a.a.) partial recombinant protein expressed in <i>Escherichia coli</i> .
Sequence	SPYSSDTPCCFAYIARPLPRAHIKEYFYTSGKCSNPAVVFVTRKNRQVCANPEKKWVREYINSLEMS
Host	Escherichia coli
Theoretical MW (kDa)	8
Form	Lyophilized
Preparation Method	<i>Escherichia coli</i> expression system
Purification	Ion exchange column and HPLC reverse phase column
Purity	> 90% by SDS-PAGE and HPLC
Endotoxin Level	< 0.1 ng/ug (1 EU/ug)
Activity	Determined by the ability to chemoattract human blood monocytes using a concentration range of 1.0 -10.0 ng/mL.
Storage Buffer	Lyophilized from PBS
Storage Instruction	Store at -20°C on dry atmosphere for 2 years. After reconstitution with deionized water, store at 4°C for 1 month or store at -20°C for 6 months. Aliquot to avoid repeated freezing and thawing.

Applications

- Functional Study
- SDS-PAGE

Gene Info — CCL5

Entrez GeneID	6352
Protein Accession#	P13501
Gene Name	CCL5
Gene Alias	D17S136E, MGC17164, RANTES, SCYA5, SISd, TCP228
Gene Description	chemokine (C-C motif) ligand 5
Omim ID	187011
Gene Ontology	Hyperlink
Gene Summary	This gene is one of several CC cytokine genes clustered on the q-arm of chromosome 17. Cytokines are a family of secreted proteins involved in immunoregulatory and inflammatory processes. The CC cytokines are proteins characterized by two adjacent cysteines. The cytokine encoded by this gene functions as a chemoattractant for blood monocytes, memory T helper cells and eosinophils. It causes the release of histamine from basophils and activates eosinophils. This cytokine is one of the major HIV-suppressive factors produced by CD8+ cells. It functions as one of the natural ligands for the chemokine receptor CCR5 and it suppresses in vitro replication of the R5 strain of HIV-1, which use CCR5 as a coreceptor. [provided by RefSeq]
Other Designations	SIS-delta T-cell specific RANTES protein T-cell specific protein p288 beta-chemokine RANTES regulated upon activation, normally T-expressed, and presumably secreted small inducible cytokine A5 small inducible cytokine A5 (RANTES) small inducible cytokine
