PDGFB (Human) Recombinant Protein

Catalog # P9010 Size 20 ug

Specification

Product Description	Human PDGFB (P01127, 82 a.a. - 190 a.a.) partial-length recombinant protein with His tag at N-Ter minus expressed in *Escherichia coli*.
Host	Escherichia coli
Theoretical MW (kDa)	16.75
Form	Liquid
Preparation Method	*Escherichia coli* expression system
Purity	> 95% by SDS PAGE
Storage Buffer	25mM Na-Acetate pH 4.8, 1mM EDTA and 50% glycerol.
Storage Instruction	Store at -20°C. Aliquot the product after reconstitution to avoid repeated freezing/thawing cycles.

Applications

- SDS-PAGE

Gene Info — PDGFB

Entrez GeneID	5155
Protein Accession#	P01127
Gene Name	PDGFB
Gene Alias	FLJ12858, PDGF2, SIS, SSV, c-sis
Gene Description	platelet-derived growth factor beta polypeptide (simian sarcoma viral (v-sis) oncogene homolog)

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Omim ID	190040
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene is a member of the platelet-derived growth factor family. The fou r members of this family are mitogenic factors for cells of mesenchymal origin and are characteriz ed by a motif of eight cysteines. This gene product can exist either as a homodimer (PDGF-BB) o r as a heterodimer with the platelet-derived growth factor alpha polypeptide (PDGF-AB), where th e dimers are connected by disulfide bonds. Mutations in this gene are associated with meningio ma. Reciprocal translocations between chromosomes 22 and 7, at sites where this gene and that for COL1A1 are located, are associated with a particular type of skin tumor called dermatofibrosa rcoma protuberans resulting from unregulated expression of growth factor. Two alternatively splice d transcript variants encoding different isoforms have been identified for this gene. [provided by R efSeq
