# ABL1 (phospho Y134) polyclonal antibody

Catalog # PAB0396 Size 400 uL

## Applications

## Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections)

Formalin-fixed and paraffin-embedded human cancer tissue reacted with ABL1 (phospho Y134) polyclonal antibody (Cat # PAB0396) which was peroxidaseconjugated to the secondary antibody followed by AEC staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated. BC = breast carcinoma.

## Dot Blot (Peptide)

Dot blot analysis of ABL1 (phospho Y134) polyclonal antibody (Cat # PAB0396) on nitrocellulose membrane. 50 ng of Phospho-peptide or Non Phospho-peptide per dot were adsorbed.

Specification	
Product Description	Rabbit polyclonal antibody raised against synthetic phosphopeptide of ABL1.
Immunogen	Synthetic phosphopeptide (conjugated with KLH) corresponding to residues surrounding Y134 of hu man ABL1.
Host	Rabbit
Reactivity	Human
Form	Liquid
Purification	Protein G purification

## **Product Information**

Recommend Usage	Immunohistochemistry (1:50-100) Dot Blot (1:500) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS (0.09% sodium azide)
Storage Instruction	Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

## Applications

#### Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Formalin-fixed and paraffin-embedded human cancer tissue reacted with ABL1 (phospho Y134) polyclonal antibody (Cat # PAB0396) which was peroxidase-conjugated to the secondary antibody followed by AEC staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated. BC = breast carcinoma.

#### Dot Blot (Peptide)

Dot blot analysis of ABL1 (phospho Y134) polyclonal antibody (Cat # PAB0396) on nitrocellulose membrane. 50 ng of Phosphopeptide or Non Phospho-peptide per dot were adsorbed.

# Gene Info — ABL1

Entrez GenelD	<u>25</u>
Protein Accession#	<u>NP_005148;P00519</u>
Gene Name	ABL1
Gene Alias	ABL, JTK7, bcr/abl, c-ABL, p150, v-abl
Gene Description	c-abl oncogene 1, receptor tyrosine kinase
Omim ID	<u>189980</u>
Gene Ontology	Hyperlink

PANIOVA	Froduce information
Gene Summary	The ABL1 protooncogene encodes a cytoplasmic and nuclear protein tyrosine kinase that has be en implicated in processes of cell differentiation, cell division, cell adhesion, and stress response. Activity of c-Abl protein is negatively regulated by its SH3 domain, and deletion of the SH3 domai n turns ABL1 into an oncogene. The t(9;22) translocation results in the head-to-tail fusion of the B CR (MIM:151410) and ABL1 genes present in many cases of chronic myelogeneous leukemia. T he DNA-binding activity of the ubiquitously expressed ABL1 tyrosine kinase is regulated by CDC 2-mediated phosphorylation, suggesting a cell cycle function for ABL1. The ABL1 gene is expres sed as either a 6- or 7-kb mRNA transcript, with alternatively spliced first exons spliced to the com mon exons 2-11. [provided by RefSeq
