ERBB4 (phospho Y1162) polyclonal antibody

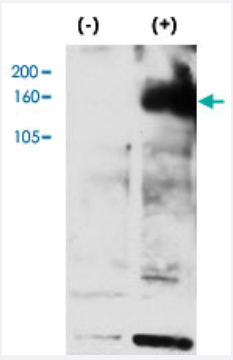

Catalog # PAB0486 Size 400 uL

Applications

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Formalin-fixed and paraffin-embedded human hepatocellular carcinoma tissue reacted with ERBB4 (phospho Y1162) polyclonal antibody (Cat # PAB0486) which was peroxidase-conjugated to the secondary antibody followed by AEC staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated. HC = hepatocarcinoma.

Western Blot (Cell lysate)

ERBB4 (phospho Y1162) polyclonal antibody (Cat # PAB0486) was used to detect Phospho-ERBB4-Y1162 in FG pancreatic carcinoma cell lysate. FG pancreatic carcinoma cells treated with or without EGF (50 ng/ml) for 15 min ERBB4 (phospho Y1162) polyclonal antibody (Cat # PAB0486) was used with 3% BSA. Data and protocol kindly provided by Dr. Weis of Cheresh Lab, UCSD.

Specification

Product Description	Rabbit polyclonal antibody raised against synthetic phosphopeptide of ERBB4.
Immunogen	Synthetic phosphopeptide (conjugated with KLH) corresponding to residues surrounding Y1162 of human ERBB4.
Host	Rabbit
Reactivity	Human
Form	Liquid

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Purification	Protein G purification
Recommend Usage	Western Blot (1:1000) Immunohistochemistry (1:50-100) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS (0.09% sodium azide)
Storage Instruction	Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

  Formalin-fixed and paraffin-embedded human hepatocellular carcinoma tissue reacted with ERBB4 (phospho Y1162) polyclonal antibody (Cat # PAB0486) which was peroxidase-conjugated to the secondary antibody followed by AEC staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated. HC = hepatocarcinoma.

- Western Blot (Cell lysate)

  ERBB4 (phospho Y1162) polyclonal antibody (Cat # PAB0486) was used to detect Phospho-ERBB4-Y1162 in FG pancreatic carcinoma cell lysate. FG pancreatic carcinoma cells treated with or without EGF (50 ng/ml) for 15 min ERBB4 (phospho Y1162) polyclonal antibody (Cat # PAB0486) was used with 3% BSA. Data and protocol kindly provided by Dr. Weis of Cheresh Lab, UCSD.

Gene Info — ERBB4

Entrez GeneID	2066
Protein Accession#	NP_005226;Q15303
Gene Name	ERBB4
Gene Alias	HER4, MGC138404, p180erbB4
Gene Description	v-erb-a erythroblastic leukemia viral oncogene homolog 4 (avian)
Omim ID	600543
Gene Ontology	Hyperlink

Gene Summary	This gene is a member of the Tyr protein kinase family and the epidermal growth factor receptor s ubfamily. It encodes a single-pass type I membrane protein with multiple cysteine rich domains, a transmembrane domain, a tyrosine kinase domain, a phosphotidylinositol-3 kinase binding site a nd a PDZ domain binding motif. The protein binds to and is activated by neuregulins and other fac tors and induces a variety of cellular responses including mitogenesis and differentiation. Multiple proteolytic events allow for the release of a cytoplasmic fragment and an extracellular fragment. M utations in this gene have been associated with cancer. Alternatively spliced variants which encod e different protein isoforms have been described; however, not all variants have been fully charact erized. [provided by RefSeq
