

BDNF polyclonal antibody

Catalog # PAB0745

Size 20 ug

Applications

Immunohistochemistry

Pro - BDNF staining within the rat spinal cord dorsal horn. Normal cryostat sections of adult rat cord were stained with recombinant human anti - proBDNF (Cat # PAB0745) and detected with HRP labelled anti - rabbit antibody. Dilution 1 : 2000 in Human mouse and rat. (Image courtesy of Dr Xin-fu Zhou).

Specification

Product Description	Rabbit polyclonal antibody raised against synthetic peptide of BDNF.
Immunogen	A synthetic peptide (conjugated with KLH) corresponding to amino acids 69-82 of human BDNF.
Sequence	ELLDEDQKVRPNEE
Host	Rabbit
Theoretical MW (kDa)	35
Reactivity	Human, Mouse, Rat
Specificity	Used in western blot, this antiserum detects a 35 KDa band corresponding to the molecular weight of proBDNF. No cross reactivity with other proneurotrophins was detected.
Form	Lyophilized
Recommend Usage	Immunohistochemistry (1-5 ug/mL) Western Blot (1-5 ug/mL) The optimal working dilution should be determined by the end user.
Storage Buffer	Lyophilized from PBS

Storage Instruction

Store at -20°C on dry atmosphere.
After reconstitution with deionized water, store at -20°C or lower.
Aliquot to avoid repeated freezing and thawing.

Applications

- Western Blot
- Immunohistochemistry

Pro - BDNF staining within the rat spinal cord dorsal horn. Normal cryostat sections of adult rat cord were stained with recombinant human anti - proBDNF (Cat # PAB0745) and detected with HRP labelled anti - rabbit antibody. Dilution 1 : 2000 in Human mouse and rat. (Image courtesy of Dr Xin-fu Zhou).

Gene Info — BDNF

Entrez GeneID [627](#)

Protein Accession# [P23560](#)

Gene Name BDNF

Gene Alias MGC34632

Gene Description brain-derived neurotrophic factor

Omim ID [113505](#) [164230](#) [209880](#) [606788](#) [607499](#)

Gene Ontology [Hyperlink](#)

Gene Summary The protein encoded by this gene is a member of the nerve growth factor family. It is induced by cortical neurons, and is necessary for survival of striatal neurons in the brain. Expression of this gene is reduced in both Alzheimer's and Huntington disease patients. This gene may play a role in the regulation of stress response and in the biology of mood disorders. Multiple transcript variants encoding distinct isoforms have been described for this gene. [provided by RefSeq]

Other Designations neurotrophin
