

# EGFR polyclonal antibody

Catalog # PAB0852      Size 200 ug

## Applications

### Western Blot (Cell lysate)

Western blot analysis of EGFR polyclonal antibody (Cat # PAB0852) expression in A-431 whole cell lysates.

## Specification

|                            |                                                                                                                        |
|----------------------------|------------------------------------------------------------------------------------------------------------------------|
| <b>Product Description</b> | Rabbit polyclonal antibody raised against a synthetic peptide of EGFR.                                                 |
| <b>Immunogen</b>           | A synthetic peptide (conjugated with KLH) corresponding to C-terminus of human EGFR.                                   |
| <b>Host</b>                | Rabbit                                                                                                                 |
| <b>Reactivity</b>          | Human, Mouse, Rat                                                                                                      |
| <b>Form</b>                | Liquid                                                                                                                 |
| <b>Recommend Usage</b>     | Western Blot (1:200)<br>The optimal working dilution should be determined by the end user.                             |
| <b>Storage Buffer</b>      | In PBS (0.2% gelatin, 0.09% sodium azide)                                                                              |
| <b>Storage Instruction</b> | Store at 4°C. Do not freeze.                                                                                           |
| <b>Note</b>                | This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |

## Applications

- Western Blot (Cell lysate)

Western blot analysis of EGFR polyclonal antibody (Cat # PAB0852) expression in A-431 whole cell lysates.

## Gene Info — EGFR

| Gene Summary       | The protein encoded by this gene is a transmembrane glycoprotein that is a member of the protein kinase superfamily. This protein is a receptor for members of the epidermal growth factor family. EGFR is a cell surface protein that binds to epidermal growth factor. Binding of the protein to a ligand induces receptor dimerization and tyrosine autophosphorylation and leads to cell proliferation. Mutations in this gene are associated with lung cancer. [provided by RefSeq] |
| Other Designations | avian erythroblastic leukemia viral (v-erb-b) oncogene homolog cell growth inhibiting protein 40 cell proliferation-inducing protein 61 epidermal growth factor receptor                                                                                                                                                                                                                                                                                                                 |
