

EGFR polyclonal antibody

Catalog # PAB10010 Size 100 ug

Applications

Western Blot (Cell lysate)

Western blot using EGFR polyclonal antibody (Cat # PAB10010) shows detection of a band at ~170 kDa (Lane 1) corresponding to human EGFR present in unstimulated (Lane 1) and EGF (50 ng/mL for 15 min) stimulated (Lane 2) A-431 whole cell lysates (arrowhead).

Approximately 30 ug of lysate was separated on a 4-20% Tris-Glycine gel by SDS-PAGE and transferred onto nitrocellulose.

After blocking the membrane was probed with the primary antibody diluted to 1:1,000.

Reaction occurred overnight at 4°C followed by washes and reaction with a 1 : 10,000 dilution of IRDye™800 conjugated Gt-a-Rabbit IgG [H&L] MX for 45 min at room temperature (800nm channel, green).

Molecular weight estimation was made by comparison to prestained MW markers in lane M (700 nm channel, red).

IRDye™800 fluorescence image was captured using the Odyssey® Infrared Imaging System developed by LI-COR.

IRDye is a trademark of LI-COR, Inc.

Specification

Product Description	Rabbit polyclonal antibody raised against synthetic peptide of EGFR.
Immunogen	A synthetic peptide corresponding to amino acids 1189-1199 of human EGFR.
Host	Rabbit
Reactivity	Human, Mouse, Rat
Form	Liquid
Quality Control Testing	Antibody Reactive Against Synthetic Peptide.

Recommend Usage	ELISA (1:8000-1:32000) Western Blot (1:500-1:5000) The optimal working dilution should be determined by the end user.
Storage Buffer	In 20 mM KH ₂ PO ₄ , 150 mM NaCl, pH 7.2 (0.01% sodium azide)
Storage Instruction	Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Western Blot (Cell lysate)

Western blot using EGFR polyclonal antibody (Cat # PAB10010) shows detection of a band at ~170 KDa (Lane 1) corresponding to human EGFR present in unstimulated (Lane 1) and EGF (50 ng/mL for 15 min) stimulated (Lane 2) A-431 whole cell lysates (arrowhead).

Approximately 30 µg of lysate was separated on a 4-20% Tris-Glycine gel by SDS-PAGE and transferred onto nitrocellulose. After blocking the membrane was probed with the primary antibody diluted to 1:1,000.

Reaction occurred overnight at 4°C followed by washes and reaction with a 1 : 10,000 dilution of IRDye™800 conjugated Gt-a-Rabbit IgG [H&L] MX for 45 min at room temperature (800nm channel, green).

Molecular weight estimation was made by comparison to prestained MW markers in lane M (700 nm channel, red).

IRDye™800 fluorescence image was captured using the Odyssey® Infrared Imaging System developed by LI-COR.

- Immunohistochemistry

- Enzyme-linked Immunoabsorbent Assay

Gene Info — EGFR

Entrez GeneID	1956
Protein Accession#	P00533;NP_005219
Gene Name	EGFR
Gene Alias	ERBB, ERBB1, HER1, PIG61, mENA
Gene Description	epidermal growth factor receptor (erythroblastic leukemia viral (v-erb-b) oncogene homolog, avian)
Omim ID	131550 211980

Gene Ontology

[Hyperlink](#)

Gene Summary

The protein encoded by this gene is a transmembrane glycoprotein that is a member of the protein kinase superfamily. This protein is a receptor for members of the epidermal growth factor family. EGFR is a cell surface protein that binds to epidermal growth factor. Binding of the protein to a ligand induces receptor dimerization and tyrosine autophosphorylation and leads to cell proliferation. Mutations in this gene are associated with lung cancer. [provided by RefSeq]

Other Designations

avian erythroblastic leukemia viral (v-erb-b) oncogene homolog|cell growth inhibiting protein 40|cell proliferation-inducing protein 61|epidermal growth factor receptor
