

KDR polyclonal antibody

Catalog # PAB12746

Size 100 ug

Applications

Immunoprecipitation

The whole cell lysate derived from human umbilical vein endothelial cell (HUVEC) was stimulated by KDR for 20 min, then immunoprecipitated by KDR polyclonal antibody (Cat # PAB12647) followed by immune-probing with KDR polyclonal antibody (Cat # PAB12746) at 1 : 500.

An immunoreactive band is observed around ~200 KDa (Lane 1). The lane 2 is a negative control.

Specification

Product Description	Rabbit polyclonal antibody raised against synthetic peptide of KDR.
Immunogen	A synthetic peptide corresponding to residues surrounding Y951 (KDYVG) of human KDR.
Host	Rabbit
Theoretical MW (kDa)	200
Reactivity	Human, Mouse
Specificity	This antibody recognizes ~200 KDa of human KDR without a phosphorylation site of Tyrosine 951. It does not recognize phosphorylated peptides.
Form	Liquid
Quality Control Testing	Antibody Reactive Against Synthetic Peptide.
Recommend Usage	Western Blot (0.1-1 ug/mL) ELISA (0.01-0.1 ug/mL) Immunoprecipitation (2-5 ug/mL) Immunohistochemistry (2-5 ug/mL) The optimal working dilution should be determined by the end user.

Storage Buffer

In TBS, pH 7.2 (BSA, 10% Proclin300)

Storage Instruction

Store at 4°C. For long term storage store at -20°C or lower.
Aliquot to avoid repeated freezing and thawing.

Applications

- Western Blot
- Immunohistochemistry
- Immunoprecipitation

The whole cell lysate derived from human umbilical vein endothelial cell (HUVEC) was stimulated by KDR for 20 min, then immunoprecipitated by KDR polyclonal antibody (Cat # PAB12647) followed by immune-probing with KDR polyclonal antibody (Cat # PAB12746) at 1 : 500.

An immunoreactive band is observed around ~200 KDa (Lane 1). The lane 2 is a negative control.

- Enzyme-linked Immunoabsorbent Assay

Gene Info — KDR

Entrez GeneID[3791](#)**Gene Name**

KDR

Gene Alias

CD309, FLK1, VEGFR, VEGFR2

Gene Description

kinase insert domain receptor (a type III receptor tyrosine kinase)

Omim ID[191306 602089](#)**Gene Ontology**[Hyperlink](#)**Gene Summary**

Vascular endothelial growth factor (VEGF) is a major growth factor for endothelial cells. This gene encodes one of the two receptors of the VEGF. This receptor, known as kinase insert domain receptor, is a type III receptor tyrosine kinase. It functions as the main mediator of VEGF-induced endothelial proliferation, survival, migration, tubular morphogenesis and sprouting. The signalling and trafficking of this receptor are regulated by multiple factors, including Rab GTPase, P2Y purine nucleotide receptor, integrin alphaVbeta3, T-cell protein tyrosine phosphatase, etc.. Mutations of this gene are implicated in infantile capillary hemangiomas. [provided by RefSeq]

Other Designations

soluble VEGFR2|vascular endothelial growth factor receptor 2
