

BIRC5 (phospho S20) polyclonal antibody (HRP)

Catalog # PAB15178

Size 100 uL

Specification

Product Description	Rabbit polyclonal antibody raised against synthetic phosphopeptide of BIRC5.
Immunogen	Synthetic phosphopeptide corresponding to residues surrounding S20 of human BIRC5.
Host	Rabbit
Reactivity	Human
Specificity	This antibody is useful for Western blot, where a band is seen ~16.5 KDa.
Form	Liquid
Conjugation	HRP
Recommend Usage	Western Blot (3 ug/mL) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS
Storage Instruction	Store at 4°C. Do not freeze.

Applications

- Western Blot

Gene Info — BIRC5

Entrez GeneID	332
Protein Accession#	O15392
Gene Name	BIRC5

Gene Alias	API4, EPR-1
Gene Description	baculoviral IAP repeat-containing 5
Omim ID	603352
Gene Ontology	Hyperlink
Gene Summary	This gene is a member of the inhibitor of apoptosis (IAP) gene family, which encode negative regulatory proteins that prevent apoptotic cell death. IAP family members usually contain multiple baculovirus IAP repeat (BIR) domains, but this gene encodes proteins with only a single BIR domain. The encoded proteins also lack a C-terminus RING finger domain. Gene expression is high during fetal development and in most tumors yet low in adult tissues. Antisense transcripts are involved in the regulation of this gene's expression. At least four transcript variants encoding distinct isoforms have been found for this gene, but the full-length natures of only three of them have been determined. [provided by RefSeq]
Other Designations	apoptosis inhibitor 4 baculoviral IAP repeat-containing protein 5 survivin variant 3 alpha
