Gene Name	APOC3
Gene Alias	APOCIII, MGC150353
Gene Description	apolipoprotein C-III
Omim ID	107720
Gene Ontology	Hyperlink
Gene Summary	Apolipoprotein C-III is a very low density lipoprotein (VLDL) protein. APOC3 inhibits lipoprotein lip ase and hepatic lipase; it is thought to delay catabolism of triglyceride-rich particles. The APOA1, APOC3 and APOA4 genes are closely linked in both rat and human genomes. The A-I and A-IV g enes are transcribed from the same strand, while the A-1 and C-III genes are convergently transcri bed. An increase in apoC-III levels induces the development of hypertriglyceridemia. [provided by RefSeq
