

# ADRB2 polyclonal antibody

Catalog # PAB18066

Size 100 ug

## Applications

### Western Blot (Cell lysate)

Western blot analysis of extracts from NIH/3T3 cells, using ADRB2 polyclonal antibody (Cat # PAB18066).

Peptide "+" means "with peptide blocking".

## Specification

|                     |                                                                                                                                                                                               |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Description | Rabbit polyclonal antibody raised against synthetic peptide of ADRB2.                                                                                                                         |
| Immunogen           | A synthetic peptide corresponding to residues surrounding S346 of human ADRB2.                                                                                                                |
| Host                | Rabbit                                                                                                                                                                                        |
| Reactivity          | Human, Mouse                                                                                                                                                                                  |
| Specificity         | This antibody is specific to ADRB2.                                                                                                                                                           |
| Form                | Liquid                                                                                                                                                                                        |
| Recommend Usage     | Western Blot (1:500~1:1000)<br>Immunohistochemistry (1:50~1:100)<br>Immunofluorescence (1:500~1:1000)<br>ELISA (1:5000)<br>The optimal working dilution should be determined by the end user. |
| Storage Buffer      | In PBS, 150mM NaCl, pH 7.4 (50% glycerol, 0.02% sodium azide)                                                                                                                                 |
| Storage Instruction | Store at -20°C.<br>Aliquot to avoid repeated freezing and thawing.                                                                                                                            |

**Note**

This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

## Applications

- Western Blot (Cell lysate)

Western blot analysis of extracts from NIH/3T3 cells, using ADRB2 polyclonal antibody (Cat # PAB18066).  
Peptide "+" means "with peptide blocking".

- Immunohistochemistry

- Immunofluorescence

- Enzyme-linked Immunoabsorbent Assay

## Gene Info — ADRB2

**Entrez GeneID** [154](#)

**Protein Accession#** [P07550](#)

**Gene Name** ADRB2

**Gene Alias** ADRB2R, ADRBR, B2AR, BAR, BETA2AR

**Gene Description** adrenergic, beta-2-, receptor, surface

**Omim ID** [109690](#) [600807](#) [601665](#)

**Gene Ontology** [Hyperlink](#)

**Gene Summary** This gene encodes beta-2-adrenergic receptor which is a member of the G protein-coupled receptor superfamily. This receptor is directly associated with one of its ultimate effectors, the class C L-type calcium channel Ca(V)1.2. This receptor-channel complex also contains a G protein, an adenylyl cyclase, cAMP-dependent kinase, and the counterbalancing phosphatase, PP2A. The assembly of the signaling complex provides a mechanism that ensures specific and rapid signaling by this G protein-coupled receptor. This gene is intronless. Different polymorphic forms, point mutations, and/or downregulation of this gene are associated with nocturnal asthma, obesity and type 2 diabetes. [provided by RefSeq]

**Other Designations** beta-2 adrenergic receptor|beta-2 adrenoceptor|catecholamine receptor
