AGTR1 polyclonal antibody

Catalog # PAB24974 Size 100 uL

Applications

Western Blot (Cell lysate)

Western blot analysis of A-549 cell lysate with AGTR1 polyclonal antibody (Cat # PAB24974) at 1:500 dilution.

Specification

Product Description	Rabbit polyclonal antibody raised against synthetic peptide of AGTR1.
Immunogen	A synthetic peptide corresponding to amino acids 150-200 of human AGTR1.
Host	Rabbit
Theoretical MW (kDa)	~43.0
Reactivity	Human, Mouse, Rat
Specificity	AGTR1 polyclonal antibody detects endogenous levels of AGTR1 protein.
Form	Liquid
Purification	Antigen affinity purification
Recommend Usage	Western Blot (1:500-1:1000) Immunohistochemistry (1:50-1:200) Immunofluorescence (1:50-1:200) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH 7.2 (0.09% sodium azide)

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Storage Instruction	Store at 4°C. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Immunohistochemistry
- Immunofluorescence
- Western Blot (Cell lysate)

  Western blot analysis of A-549 cell lysate with AGTR1 polyclonal antibody (Cat # PAB24974) at 1:500 dilution.

Gene Info — AGTR1

Entrez GeneID	185
Gene Name	AGTR1
Gene Alias	AG2S, AGTR1A, AGTR1B, AT1, AT1B, AT1R, AT2R1, AT2R1A, AT2R1B, HAT1R
Gene Description	angiotensin II receptor, type 1
Omim ID	106165 145500 267430
Gene Ontology	Hyperlink
Gene Summary	Angiotensin II is a potent vasopressor hormone and a primary regulator of aldosterone secretion. I t is an important effector controlling blood pressure and volume in the cardiovascular system. It act s through at least two types of receptors. This gene encodes the type 1 receptor which is thought t o mediate the major cardiovascular effects of angiotensin II. This gene may play a role in the gene ration of reperfusion arrhythmias following restoration of blood flow to ischemic or infarcted myoca rdium. It was previously thought that a related gene, denoted as AGTR1B, existed; however, it is n ow believed that there is only one type 1 receptor gene in humans. At least five transcript variants have been described for this gene. Additional variants have been described but their full-length na ture has not been determined. The entire coding sequence is contained in the terminal exon and i s present in all transcript variants. [provided by RefSeq
Other Designations	angiotensin receptor 1|angiotensin receptor 1B|type-1B angiotensin II receptor
