

ALB polyclonal antibody

Catalog # PAB29197 Size 500 ug

Specification	
Product Description	Chicken polyclonal antibody raised against native Human ALB.
Immunogen	Native purified normal human serum albumin.
Host	Chicken
Reactivity	Human
Form	Liquid
Purification	Antigen affinity purification
Isotype	lgY
Recommend Usage	ELISA Western Blot The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH 7.2 (0.05% sodium azide)
Storage Instruction	Store at 4°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Western Blot
- Enzyme-linked Immunoabsorbent Assay

Gene Info — ALB

Entrez GenelD	<u>213</u>
Gene Name	ALB
Gene Alias	DKFZp779N1935, PRO0883, PRO0903, PRO1341
Gene Description	albumin
Omim ID	<u>103600</u> <u>194470</u>
Gene Ontology	<u>Hyperlink</u>
Gene Summary	Albumin is a soluble, monomeric protein which comprises about one-half of the blood serum prote
	in. Albumin functions primarily as a carrier protein for steroids, fatty acids, and thyroid hormones a nd plays a role in stabilizing extracellular fluid volume. Albumin is a globular unglycosylated serum protein of molecular weight 65,000. Albumin is synthesized in the liver as preproalbumin which ha s an N-terminal peptide that is removed before the nascent protein is released from the rough end oplasmic reticulum. The product, proalbumin, is in turn cleaved in the Golgi vesicles to produce the secreted albumin. [provided by RefSeq

Disease

- Alzheimer disease
