CD8A VHH-hIgG1 humanized monoclonal antibody, clone A9

Catalog # RAB01120-M02J

Size 50 ug

Applications

Flow Cytometry

Flow cytometry analysis of enriched human CD3 T cells were treated with CD8A VHH-hIgG1 humanized monoclonal antibody, clone A9 (Cat # RAB01120-M02J). This antibody efficiently bound to human CD8 T cells.

Specification

Product Description Humanized VHH recombinant monoclonal antibody raised against CD8A protein.

Antibody Species Human

Immunogen Human CD8A recombinant protein

Reactivity Human

Specificity This antibody recognizes human CD8A.

Form Liquid

Purification Protein A sepharose

Isotype Human IgG1 with LALAPG mutations in Fc fragment

Storage Buffer In PBS, pH 7.4

Storage Instruction

Store at -80°C.
Aliquot to avoid repeated freezing and thawing.

Applications

- Flow Cytometry

Flow cytometry analysis of enriched human CD3 T cells were treated with CD8A VHH-hlgG1 humanized monoclonal antibody, clone A9 (Cat # RAB01120-M02J). This antibody efficiently bound to human CD8 T cells.

Gene Info — CD8A

Entrez GeneID	925
---------------	---------------------

Gene Name	CD8A
-----------	------

Gene Alias	CD8, Leu2, MAL, p32
------------	---------------------

Gene Description	CD8a molecule
------------------	---------------

Omim ID	186910 608957
---------	-------------------------------

Gene Ontology	Hyperlink
---------------	---------------------------

Gene Summary	The CD8 antigen is a cell surface glycoprotein found on most cytotoxic T lymphocytes that mediates efficient cell-cell interactions within the immune system. The CD8 antigen acts as a coreceptor with the T-cell receptor on the T lymphocyte to recognize antigens displayed by an antigen presenting cell (APC) in the context of class I MHC molecules. The coreceptor functions as either a homodimer composed of two alpha chains, or as a heterodimer composed of one alpha and one beta chain. Both alpha and beta chains share significant homology to immunoglobulin variable light chains. This gene encodes the CD8 alpha chain isoforms. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq]
