Gene Description

Bruton agammaglobulinemia tyrosine kinase

Omim ID[300300](#) [307200](#)**Gene Ontology**[Hyperlink](#)**Gene Summary**

The protein encoded by this gene plays a crucial role in B-cell development. Mutations in this gene cause X-linked agammaglobulinemia type 1, which is an immunodeficiency characterized by the failure to produce mature B lymphocytes, and associated with a failure of Ig heavy chain rearrangement.
