**Gene Description**

v-src sarcoma (Schmidt-Ruppin A-2) viral oncogene homolog (avian)

**Omim ID**[190090](#)**Gene Ontology**[Hyperlink](#)**Gene Summary**

This gene is highly similar to the v-src gene of Rous sarcoma virus. This proto-oncogene may play a role in the regulation of embryonic development and cell growth. The protein encoded by this gene is a tyrosine-protein kinase whose activity can be inhibited by phosphorylation by c-SRC kinase. Mutations in this gene could be involved in the malignant progression of colon cancer. Two transcript variants encoding the same protein have been found for this gene. [provided by RefSeq]
