

RecomAb™

CBX1 recombinant monoclonal antibody, clone RAB-C145

Catalog # RAB03120 Size 100 ug

Specification	
Product Description	Human recombinant monoclonal antibody raised against human CBX1.
Antibody Species	Human
Immunogen	Original antibody is raised against CBX1 protein under non-denaturing conditions.
Reactivity	Human
Form	Liquid
Isotype	Fab fragment kappa
Recommend Usage	ChIP ELISA Immunofluorescence IP-MS The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS with 0.02% Proclin 300
Storage Instruction	Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C. Aliquot to avoid repeated freezing and thawing.

Applications

- ChIP
- Immunofluorescence
- Enzyme-linked Immunoabsorbent Assay

Gene Info — CBX1	
Entrez GenelD	<u>10951</u>
Gene Name	CBX1
Gene Alias	CBX, HP1-BETA, HP1Hs-beta, HP1Hsbeta, M31, MOD1, p25beta
Gene Description	chromobox homolog 1 (HP1 beta homolog Drosophila)
Omim ID	604511
Gene Ontology	Hyperlink
Gene Summary	This gene encodes a highly conserved nonhistone protein, which is a member of the heterochrom atin protein family. The protein is enriched in the heterochromatin and associated with centromer es. The protein has a single N-terminal chromodomain which can bind to histone proteins via met hylated lysine residues, and a C-terminal chromo shadow-domain (CSD) which is responsible for the homodimerization and interaction with a number of chromatin-associated nonhistone proteins. The protein may play an important role in the epigenetic control of chromatin structure and gene e xpression. Several related pseudogenes are located on chromosomes 1, 3, and X. Multiple altern atively spliced variants, encoding the same protein, have been identified. [provided by RefSeq
Other Designations	heterochromatin protein 1-beta heterochromatin protein p25 beta modifier 1 protein
