

RecomAb™

# EGFR recombinant monoclonal antibody, clone 528

Catalog # RAB03426      Size 200 ug

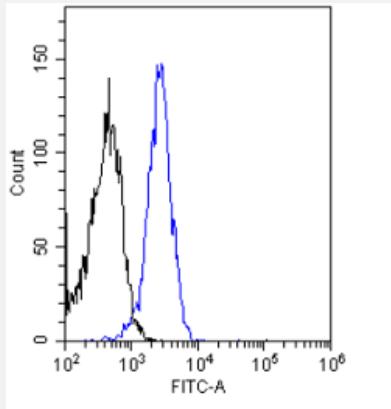

## Applications

### Immunofluorescence

Immunofluorescent staining of HeLa cells with EGFR recombinant monoclonal antibody, clone 528 (Cat # RAB03426).

Immunofluorescence analysis of paraformaldehyde fixed HeLa cells permeabilized with 0.15% Triton stained with the chimeric r version of RAB03426 at 10 ug/mL for 1h followed by Alexa Fluor® 488 secondary antibody (1 ug/mL), showing membrane staining. The nuclear stain is DAPI (blue). The negative control was stained with unimmunized r followed by Alexa Fluor® 488 secondary antibody.

### Flow Cytometry

Flow cytometric analysis of HeLa cells with EGFR recombinant monoclonal antibody, clone 528 (Cat # RAB03426).

HeLa cells were stained with unimmunized r antibody (black line) or the rmeric version of RAB03426 (blue line) at a concentration of 10 ug/mL for 30 mins at RT. After washing the bound antibody was detected using an anti-r JK (FITC-conjugate) antibody (129936) at 2 ug/mL and cells analyzed using a FACSCanto flow-cytometer.

## Specification

Product Description	Rabbit recombinant monoclonal antibody raised against human EGFR.
Antibody Species	Rabbit
Immunogen	Original antibody is raised against partially purified EGFR from A431 cells.
Reactivity	Human

Form	Liquid
Isotype	IgG
Recommend Usage	Flow Cytometry Immunofluorescence Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) Immunoprecipitation Neutralization Western Blot The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS with 0.02% Proclin 300
Storage Instruction	Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C. Aliquot to avoid repeated freezing and thawing.

## Applications

- Western Blot
- Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)
- Immunofluorescence

Immunofluorescent staining of HeLa cells with EGFR recombinant monoclonal antibody, clone 528 (Cat # RAB03426). Immunofluorescence analysis of paraformaldehyde fixed HeLa cells permeabilized with 0.15% Triton stained with the chimeric r version of RAB03426 at 10 ug/mL for 1 h followed by Alexa Fluor® 488 secondary antibody (1 ug/mL), showing membrane staining. The nuclear stain is DAPI (blue). The negative control was stained with unimmunized r followed by Alexa Fluor® 488 secondary antibody.

- Immunoprecipitation
- Flow Cytometry

Flow cytometric analysis of HeLa cells with EGFR recombinant monoclonal antibody, clone 528 (Cat # RAB03426). HeLa cells were stained with unimmunized r antibody (black line) or the rmeric version of RAB03426 (blue line) at a concentration of 10 ug/mL for 30 mins at RT. After washing the bound antibody was detected using an anti-r JK (FITC-conjugate) antibody (129936) at 2 ug/mL and cells analyzed using a FACSCanto flow-cytometer.

- Neutralization

## Gene Info — EGFR

Entrez GeneID

[1956](#)

Gene Name	EGFR
Gene Alias	ERBB, ERBB1, HER1, PIG61, mENA
Gene Description	epidermal growth factor receptor (erythroblastic leukemia viral (v-erb-b) oncogene homolog, avian )
Omim ID	<a href="#">131550 211980</a>
Gene Ontology	<a href="#">Hyperlink</a>
Gene Summary	The protein encoded by this gene is a transmembrane glycoprotein that is a member of the protein kinase superfamily. This protein is a receptor for members of the epidermal growth factor family. EGFR is a cell surface protein that binds to epidermal growth factor. Binding of the protein to a ligand induces receptor dimerization and tyrosine autophosphorylation and leads to cell proliferation. Mutations in this gene are associated with lung cancer. [provided by RefSeq]
Other Designations	avian erythroblastic leukemia viral (v-erb-b) oncogene homolog cell growth inhibiting protein 40 ce II proliferation-inducing protein 61 epidermal growth factor receptor
