

RecomAb™

IL5 recombinant monoclonal antibody, clone 2E3

Catalog # RAB03586 Size 200 ug

Specification

Product Description	Mouse recombinant monoclonal antibody raised against human IL5.
Antibody Species	Mouse
Immunogen	Original antibody is raised against recombinant protein corresponding to human IL5.
Reactivity	Human
Form	Liquid
Isotype	IgG2a kappa
Recommend Usage	ELISA Neutralization The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS (0.02% Proclin 300)
Storage Instruction	Store at 4°C for 3 months. For long term storage, aliquot and store at -20°C. Aliquot to avoid repeated freezing and thawing.

Applications

- Enzyme-linked Immunoabsorbent Assay
- Neutralization

Gene Info — IL5

Entrez GeneID [3567](#)

Gene Name IL5

Gene Alias	EDF, IL-5, TRF
Gene Description	interleukin 5 (colony-stimulating factor, eosinophil)
Omim ID	147850
Gene Ontology	Hyperlink
Gene Summary	The protein encoded by this gene is a cytokine that acts as a growth and differentiation factor for both B cells and eosinophils. This cytokine is a main regulator of eosinopoiesis, eosinophil maturation and activation. The elevated production of this cytokine is reported to be related to asthma or hypereosinophilic syndromes. The receptor of this cytokine is a heterodimer, whose beta subunit is shared with the receptors for interleukin 3 (IL3) and colony stimulating factor 2 (CSF2/GM-CSF). This gene, together with those for interleukin 4 (IL4), interleukin 13 (IL13), and CSF2, form a cytokine gene cluster on chromosome 5. This cytokine, IL4, and IL13 are found to be regulated coordinately by long-range regulatory elements spread over 120 kilobases on chromosome 5q31. [provided by RefSeq]
Other Designations	B cell differentiation factor OTTHUMP00000065830 T-cell replacing factor eosinophil differentiation factor interleukin 5 interleukin-5
