

RecomAb™

TLR2 recombinant monoclonal antibody, clone TL2.1

Catalog # RAB03907 Size 200 ug

Specification

Product Description	Mouse recombinant monoclonal antibody raised against immunising BALB/c mice with CHO cells transfected with human TLR2 cDNA.
Antibody Species	Mouse
Immunogen	Original antibody is raised against recombinant protein corresponding to immunising BALB/c mice with CHO cells transfected with human TLR2 cDNA.
Reactivity	Human
Form	Liquid
Isotype	IgG2a kappa
Recommend Usage	Blocking Flow cytometry Immunofluorescence Immunoprecipitation Western Blot The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS (0.02% Proclin 300)
Storage Instruction	Store at 4°C for 3 months. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.

Applications

- Western Blot
- Immunofluorescence
- Immunoprecipitation

- Blocking
- Flow Cytometry

Gene Info — TLR2

Entrez GeneID [7097](#)

Protein Accession# [O60603](#)

Gene Name TLR2

Gene Alias CD282, TIL4

Gene Description toll-like receptor 2

Omim ID [114500 246300 603028](#)

Gene Ontology [Hyperlink](#)

Gene Summary

The protein encoded by this gene is a member of the Toll-like receptor (TLR) family which plays a fundamental role in pathogen recognition and activation of innate immunity. TLRs are highly conserved from Drosophila to humans and share structural and functional similarities. They recognize pathogen-associated molecular patterns (PAMPs) that are expressed on infectious agents, and mediate the production of cytokines necessary for the development of effective immunity. The various TLRs exhibit different patterns of expression. This gene is expressed most abundantly in peripheral blood leukocytes, and mediates host response to Gram-positive bacteria and yeast via stimulation of NF-kappaB. [provided by RefSeq]

Other Designations toll/interleukin 1 receptor-like 4
