

RecomAb™

ATM recombinant monoclonal antibody, clone 3G11

Catalog # RAB03977 Size 100 uL

Applications

Immunohistochemistry

Immunohistochemistry staining in paraffin-embedded human testis tissue.

Flow Cytometry

Overlay histogram showing HeLa cells stained with ATM recombinant monoclonal antibody, clone 3G11 (red line) at 1:50.

Specification

Product Description	Rabbit recombinant monoclonal antibody raised against human ATM.
Antibody Species	Rabbit
Immunogen	Original antibody is raised against recombinant protein corresponding to full length human ATM.
Reactivity	Human
Form	Liquid
Purification	Affinity-chromatography

Isotype	IgG
Recommend Usage	ELISA Immunohistochemistry (1:50-1:200) Flow Cytometry(1:20-1:200) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH7.4 (150mM NaCl, 50% glycerol and 0.02% sodium azide)
Storage Instruction	store at -20 °C or -80 °C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Immunohistochemistry

Immunohistochemistry staining in paraffin-embedded human testis tissue.

- Enzyme-linked Immunoabsorbent Assay

- Flow Cytometry

Overlay histogram showing Hela cells stained with ATM recombinant monoclonal antibody, clone 3G11 (red line) at 1:50.

Gene Info — ATM

Entrez GeneID	472
Protein Accession#	Q13315
Gene Name	ATM
Gene Alias	AT1, ATA, ATC, ATD, ATDC, ATE, DKFZp781A0353, MGC74674, TEL1, TELO1
Gene Description	ataxia telangiectasia mutated
Omim ID	114480 208900 607585
Gene Ontology	Hyperlink

Gene Summary

The protein encoded by this gene belongs to the PI3/P4-kinase family. This protein is an important cell cycle checkpoint kinase that phosphorylates; thus, it functions as a regulator of a wide variety of downstream proteins, including tumor suppressor proteins p53 and BRCA1, checkpoint kinase CHK2, checkpoint proteins RAD17 and RAD9, and DNA repair protein NBS1. This protein and the closely related kinase ATR are thought to be master controllers of cell cycle checkpoint signaling pathways that are required for cell response to DNA damage and for genome stability. Mutations in this gene are associated with ataxia telangiectasia, an autosomal recessive disorder. Two transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq]

Other Designations

AT mutated|TEL1, telomere maintenance 1, homolog|ataxia telangiectasia mutated (includes complementation groups A, C and D)|ataxia telangiectasia mutated protein|human phosphatidylinositol 3-kinase homolog|serine-protein kinase ATM
