RecomAb™

APOC3 recombinant monoclonal antibody, clone 8H12

Catalog # RAB04098 Size 100 uL

Applications

Immunohistochemistry

Immunohistochemistry image of APOC3 recombinant monoclonal antibody, clone 8H12 diluted at 1:100 and staining in paraffin-embedded human liver tissue performed on a Leica BondTM system.

Specification

Product Description	Rabbit recombinant monoclonal antibody raised against human APOC3.
Antibody Species	Rabbit
Immunogen	Original antibody is raised against recombinant protein corresponding to full length human APOC3.
Reactivity	Human
Form	Liquid
Preparation Method	Mammalian cell (HEK293) expression system
Purification	Affinity chromatography
Isotype	IgG
Recommend Usage	ELISA Immunohistochemistry (1:50-1:200) The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH7.4 (150mM NaCl, 50% glycerol and 0.02% sodium azide)

Copyright © 2023 Abnova Corporation. All Rights Reserved.

Storage Instruction	Store at -20 °C or -80 °C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Immunohistochemistry

  Immunohistochemistry image of APOC3 recombinant monoclonal antibody, clone 8H12 diluted at 1:100 and staining in paraffin-embedded human liver tissue performed on a Leica BondTM system.

- Enzyme-linked Immunoabsorbent Assay

Gene Info — APOC3

Entrez GeneID	345
Protein Accession#	P02656
Gene Name	APOC3
Gene Alias	APOCIII, MGC150353
Gene Description	apolipoprotein C-III
Omim ID	107720
Gene Ontology	Hyperlink
Gene Summary	Apolipoprotein C-III is a very low density lipoprotein (VLDL) protein. APOC3 inhibits lipoprotein lip ase and hepatic lipase; it is thought to delay catabolism of triglyceride-rich particles. The APOA1, APOC3 and APOA4 genes are closely linked in both rat and human genomes. The A-I and A-IV g enes are transcribed from the same strand, while the A-1 and C-III genes are convergently transcri bed. An increase in apoC-III levels induces the development of hypertriglyceridemia. [provided by RefSeq
Other Designations	-
