### **Product Information**

Gene Summary	BLAST1 is the designation used for an activation-associated cell surface glycoprotein of 40 to 45 kD expressed primarily in mitogen-stimulated human lymphocytes. The protein sequence predicte d by the cDNA encoding BLAST1 indicates that BLAST1 is a member of the immunoglobulin sup ergene family. Yokoyama (1991) identified the BLAST1 activation/adhesion molecule as CD48.[s upplied by OMIM
