Anti-Nivolumab recombinant monoclonal antibody, clone 6G5 (Biotin)

Catalog # RAB09628 Size 40 ug

Applications

Enzyme-linked Immunoabsorbent Assay

Anti-Nivolumab monoclonal antibody, clone 6G5 (Biotin) (Cat # RAB09628) binds with Nivolumab, Coating antigen: Nivolumab, 1 ug/mL. Anti-Nivolumab monoclonal antibody, clone 6G5 (Biotin) dilution start from 1000 ng/mL. EC_{50} = 3.01 ng/mL. While the antibody does not recognize human IgG Fc fragment (data not shown).

Specification

Product Description	Recombinant mouse monoclonal antibody raised against Nivolumab. Target gene is PD-1.
Immunogen	Nivolumab.
Host	Mouse
Specificity	The product is specific for Nivolumab. The antibody is recommended as a detection antibody in a ph armacokinetic (PK) bridging assay with capture antibody Anti-Nivolumab recombinant monoclonal a ntibody, clone 8G6G3D8 (Cat # RAB09627).
Form	Lyophilized
Conjugation	Biotin
Preparation Method	This antibody is produced from a hybridoma resulting from the fusion of partner and B-lymphocytes o btained from a mouse immunized with Nivolumab.
Purification	Protein A purification
Isotype	IgG1

Recommend Usage	ELISA (0.01-0.1 ug/mL (Direct/Indirect)) The optimal working dilution should be determined by the end user.
Inhibitory IC50	Non-inhibitory
Storage Buffer	Lyophilized from PBS, pH 7.4 (1% BSA, 0.02% sodium azide).
Storage Instruction	Store at -20°C on dry atmospher. The lyophilized product remains stable up to 1 year at -20°C from d ate of receipt. After reconstitution with deionized water (or equivalent) to a final concentration of 0.5 mg/mL, it can b e stored for 2-3 weeks at 2-8°C or for up to 12 months at -20°C or below. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Enzyme-linked Immunoabsorbent Assay

  Anti-Nivolumab monoclonal antibody, clone 6G5 (Biotin) (Cat # RAB09628) binds with Nivolumab, Coating antigen: Nivolumab, 1 ug/mL. Anti-Nivolumab monoclonal antibody, clone 6G5 (Biotin) dilution start from 1000 ng/mL. EC_{50} = 3.01 ng/mL. While the antibody does not recognize human IgG Fc fragment (data not shown).

Gene Info — PDCD1

Entrez GeneID	5133
Gene Name	PDCD1
Gene Alias	CD279, PD1, SLEB2, hPD-1, hPD-l
Gene Description	programmed cell death 1
Omim ID	152700 600244
Gene Ontology	Hyperlink
Gene Summary	This gene encodes a cell surface membrane protein of the immunoglobulin superfamily. This prot ein is expressed in pro-B-cells and is thought to play a role in their differentiation. In mice, express ion of this gene is induced in the thymus when anti-CD3 antibodies are injected and large number s of thymocytes undergo apoptosis. Mice deficient for this gene bred on a BALB/c background de veloped dilated cardiomyopathy and died from congestive heart failure. These studies suggest th at this gene product may also be important in T cell function and contribute to the prevention of aut oimmune diseases. [provided by RefSeq
