

DNA Transfection Reagent

Catalog # U0407

Size 500 uL

Applications

Competitor (Left) and DNA Transfection Reagent (Right).

6-well transfection:

6-well transfection:

□

Specification

Product Description	DNA Transfection Reagent is low cell toxicity and a non-liposome reagent optimized for DNA delivery. It provides effective, reproducible, and affordable benefits for scientific research.
Regulatory Status	For research use only (RUO)
Quality Control Testing	293T cells Competitor (Left) and DNA Transfection Reagent (Right).
Storage Instruction	Store at -20°C.
Note	6-well transfection: 6-well transfection:

Applications

- Purification
