

Streptavidin Magnetic Microspheres

Catalog # U0568

Size 100 mL

Specification

Product Description	Streptavidin Magnetic Microspheres are polydisperse ferrimagnetic beads for capture, purification, separation, and chemiluminescence immunoassay.
Material	Fe ₃ O ₄
Particle Size	0.6 μ m - 3 μ m
Density	1.05 - 3.38 g/cm ³
Surface Group	Streptavidin (SA)
Form	Liquid
Solids	0.01
Recommend Usage	Chemiluminescence immunoassay DNA/RNA Capture Exosome isolation Purification Separation
Dispersion Medium	Pure water (trace amount of surfactant)
Storage Instruction	Store at 2-8°C. Do not freeze.

Applications

- Purification
