

Cationic Magnetic Microspheres

Catalog # U0569

Size 100 mL

Specification

Product Description	Cationic Magnetic Microspheres are polydisperse ferrimagnetic beads for cell-free DNA extraction and purification.
Material	Fe ₃ O ₄
Particle Size	~450 nm
Surface Group	Cations
Form	Liquid
Solids	0.025
Recommend Usage	DNA extraction Purification
Dispersion Medium	DI water (trace amount of surfactant)
Storage Instruction	Store at 2-25°C. Do not freeze.

Applications

- Purification
