

FFPE miRNA ISH Pretreatment Solution

Catalog # U0574

Size 500 mL

Specification

Product Description	FFPE miRNA FISH Pretreatment Solution is used for the pretreatment of formalin-fixed paraffin-embedded (FFPE) tissue sections in microRNA in situ hybridization.
Form	Liquid
Storage Instruction	Store at room temperature (4-25°C).
Note	FFPE miRNA FISH Pretreatment Solution is optimized for performance with miRNA probes.

Applications

- Fluorescent *In Situ* Hybridization (Formalin/PFA-fixed paraffin-embedded sections)
