Purification Magnetic Beads

Catalog # U0878 Size 5 mL

Applications

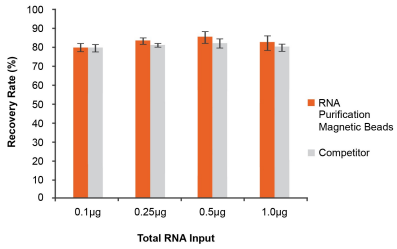

Figure 1. Total RNA recovery rates of varying input amounts following sample purification using RNA Purification Magnetic Beads compared to an equivalent Competitor product.

RNAi Knockdown

RNA recovery rates of varying input amounts following sample purification using RNA Purification Magnetic Beads compared to an equivalent Competitor product.

Specification

Product Description	RNA Purification Magnetic Beads are paramagnetic particles coated with carboxyl groups that can r eversibly bind to nucleic acids. The RNA magnetic separation beads are specifically formulated for u sage with RNA and can be used to concentrate and purify samples resulting in reproducible, high yiel d and purity.
Form	Liquid
Recommend Usage	NGS Library clean up. RNA clean up. RNA concentration. The optimal working dilution should be determined by the end user.
Storage Instruction	Store at 4°C. Do not freeze.
