Gene Name ARL4D

Gene Alias ARF4L, ARL6

Gene Description ADP-ribosylation factor-like 4D

Omim ID [600732](#)

Gene Ontology [Hyperlink](#)

**Gene Summary** ADP-ribosylation factor 4D is a member of the ADP-ribosylation factor family of GTP-binding proteins. ARL4D is closely similar to ARL4A and ARL4C and each has a nuclear localization signal and an unusually high guanine nucleotide exchange rate. This protein may play a role in membrane-associated intracellular trafficking. Mutations in this gene have been associated with Bardet-Biedl syndrome (BBS). [provided by RefSeq]
