

Albumin (Human) ELISA Kit

Catalog # KA0454 Size 1 Kit

Specification

Product Description	Albumin (Human) ELISA Kit is a competitive enzyme immunoassay for the quantitative measurement of human albumin.
Suitable Sample	Plasma, Serum
Sample Volume	25 uL
Label	Peroxidase-conjugated
Detection Method	Colorimetric
Assay Type	Quantitative
Calibration Range	0.391 to 100 ug/mL
Reactivity	Human
Regulation Status	For research use only (RUO)
Storage Instruction	Store components of the kit at 4°C or -20°C as described in the protocol.

Applications

- Quantification

Gene Info — ALB

Entrez GeneID	213
Gene Name	ALB
Gene Alias	DKFZp779N1935, PRO0883, PRO0903, PRO1341

Gene Description	albumin
Omim ID	103600_194470
Gene Ontology	Hyperlink
Gene Summary	<p>Albumin is a soluble, monomeric protein which comprises about one-half of the blood serum protein. Albumin functions primarily as a carrier protein for steroids, fatty acids, and thyroid hormones and plays a role in stabilizing extracellular fluid volume. Albumin is a globular unglycosylated serum protein of molecular weight 65,000. Albumin is synthesized in the liver as preproalbumin which has an N-terminal peptide that is removed before the nascent protein is released from the rough endoplasmic reticulum. The product, proalbumin, is in turn cleaved in the Golgi vesicles to produce the secreted albumin. [provided by RefSeq]</p>
Other Designations	cell growth inhibiting protein 42 growth-inhibiting protein 20 serum albumin
