

ADIPOQ monoclonal antibody, clone 5H7

Catalog # MAB1072 Size 100 uL

Applications

Western Blot (Transfected lysate)

Western blot analysis of Lane 1: Adiponectin collagen domain(15-107 a.a.) transfected 293T cell lysate; Lane 2: Adiponectin Full domain(15-244 a.a.) transfected 293T cell lysate; Lane 3: Adiponectin globular domain (108-244 a.a.) transfected 293T cell lysate.

Immunocytochemistry

Immunocytochemistry analysis of Hep3B cells. The cell was stained with ADIPOQ monoclonal antibody, clone 5H7 (Cat#MAB1072) (1:100). The secondary antibody (green) was used Alexa Fluor 488. DAPI was stained the cell nucleus (blue).

Specification

Product Description	Mouse monoclonal antibody raised against partial recombinant ADIPOQ.
Immunogen	Recombinant protein corresponding to amino acids 15-244 of human ADIPOQ.
Host	Mouse
Reactivity	Human, Mouse
Specificity	This antibody has the specificity against collagen-like domain of ADIPOQ.
Form	Liquid
Purification	Protein G purification

Isotype	IgG1, kappa
Recommend Usage	ELISA Immunocytochemistry Immunofluorescence Western Blot The optimal working dilution should be determined by the end user.
Storage Buffer	In PBS, pH 7.4 (10% glycerol, 0.02% sodium azide).
Storage Instruction	Store at 2°C to 8°C for 1 week. For long term storage, aliquot and store at -20°C to -80°C. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Western Blot (Transfected lysate)

Western blot analysis of Lane 1: Adiponectin collagen domain(15-107 a.a.) transfected 293T cell lysate; Lane 2: Adiponectin Full domain(15-244 a.a.) transfected 293T cell lysate; Lane 3: Adiponectin globular domain (108-244 a.a.) transfected 293T cell lysate.

- Immunocytochemistry

Immunocytochemistry analysis of Hep3B cells. The cell was stained with ADIPOQ monoclonal antibody, clone 5H7 (Cat#MAB1072) (1:100). The secondary antibody (green) was used Alexa Fluor 488. DAPI was stained the cell nucleus (blue).

- Immunofluorescence

- Enzyme-linked Immunoabsorbent Assay

Gene Info — ADIPOQ

Entrez GeneID	9370
GeneBank Accession#	NM_004797
Protein Accession#	NP_004788
Gene Name	ADIPOQ
Gene Alias	ACDC, ACRP30, ADPN, APM-1, APM1, GBP28, adiponectin
Gene Description	adiponectin, C1Q and collagen domain containing

Omim ID	605441
Gene Ontology	Hyperlink
Gene Summary	This gene is expressed in adipose tissue exclusively. It encodes a protein with similarity to collagens X and VIII and complement factor C1q. The encoded protein circulates in the plasma and is involved with metabolic and hormonal processes. [provided by RefSeq]
Other Designations	adipocyte, C1Q and collagen domain containing adipocyte, C1Q and collagen domain-containing adiponectin adipose most abundant gene transcript 1 gelatin-binding protein 28
