

Anti-Nivolumab monoclonal antibody, clone 33H4

Catalog # MAB23098 Size 40 ug

Applications

Enzyme-linked Immunoabsorbent Assay

ELISA binding of Anti-Nivolumab monoclonal antibody, clone 33H4 (Cat # MAB23098) with Nivolumab. While the antibody does not recognize the human IgG Fc fragment (data not shown). Coating antigen: Nivolumab, 1 ug/mL. Anti-Nivolumab monoclonal antibody, clone 33H4 (Cat # MAB23098) dilutions start from 1000 ng/mL. $EC_{50} = 22.48$ ng/mL.

Sandwich ELISA

Standard curve of Nivolumab Sandwich ELISA. The Nivolumab Sandwich ELISA assay is developed by using Anti-Nivolumab monoclonal antibody, clone 33H4 (Cat # MAB23098) and Anti-Nivolumab monoclonal antibody, clone 40F11 (Cat # MAB23099) as the capture and detection antibodies, respectively. In this ELISA assay, Anti-Nivolumab monoclonal antibody, clone 40F11 (Cat # MAB23099) was labeled with Biotin. The sensitivity of detecting Nivolumab is up to 78 pg/mL.

Blocking

Anti-Nivolumab monoclonal antibody, clone 33H4 (Cat # MAB23098) blocks Nivolumab binding with Human PD-1 recombinant protein (PD-1 Fc Chimera, Human). Coating antigen: Nivolumab, 1 ug/mL. PD-1-Fc-biotin final concentration: 10 ng/mL. Anti-Nivolumab monoclonal antibody, clone 33H4 (Cat # MAB23098) dilutions start from 10 ug/mL. $IC_{50} = 0.48$ ug/mL.

Specification

Product Description

Rabbit monoclonal antibody raised against Nivolumab.
Target gene is PD-1.

Immunogen	Nivolumab.
Host	Rabbit
Specificity	The antibody is recommended as a capture antibody in a pharmacokinetic (PK) bridging assay with detection antibody Anti-Nivolumab monoclonal antibody, clone 40F11 (Cat # MAB23099).
Form	Lyophilized
Preparation Method	This antibody is produced from a hybridoma resulting from the fusion of partner and B-lymphocytes obtained from a rabbit immunized with Nivolumab.
Purification	Protein A purification
Isotype	IgG
Recommend Usage	ELISA (ELISA detection: 0.01-0.1 ug/mL) (Direct/Indirect ELISA) Sandwich ELISA The optimal working dilution should be determined by the end user.
Inhibitory IC50	0.484 ug/mL
Storage Buffer	Lyophilized from PBS, pH 7.4 (0.02% sodium azide).
Storage Instruction	Store at -20°C on dry atmosphere. The lyophilized product remains stable up to 1 year at -20°C from date of receipt. After reconstitution with deionized water (or equivalent) to a final concentration of 0.5 mg/mL, it can be stored for 2-3 weeks at 2-8°C or for up to 12 months at -20°C or below. Aliquot to avoid repeated freezing and thawing.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Applications

- Enzyme-linked Immunoabsorbent Assay

ELISA binding of Anti-Nivolumab monoclonal antibody, clone 33H4 (Cat # MAB23098) with Nivolumab. While the antibody does not recognize the human IgG Fc fragment (data not shown). Coating antigen: Nivolumab, 1 ug/mL. Anti-Nivolumab monoclonal antibody, clone 33H4 (Cat # MAB23098) dilutions start from 1000 ng/mL. EC₅₀ = 22.48 ng/mL.

- Sandwich ELISA

Standard curve of Nivolumab Sandwich ELISA. The Nivolumab Sandwich ELISA assay is developed by using Anti-Nivolumab monoclonal antibody, clone 33H4 (Cat # MAB23098) and Anti-Nivolumab monoclonal antibody, clone 40F11 (Cat # MAB23099) as the capture and detection antibodies, respectively. In this ELISA assay, Anti-Nivolumab monoclonal antibody, clone 40F11 (Cat # MAB23099) was labeled with Biotin. The sensitivity of detecting Nivolumab is up to 78 pg/mL.

- Blocking

Anti-Nivolumab monoclonal antibody, clone 33H4 (Cat # MAB23098) blocks Nivolumab binding with Human PD-1 recombinant protein (PD-1 Fc Chimera, Human). Coating antigen: Nivolumab, 1 ug/mL. PD-1-Fc-biotin final concentration: 10 ng/mL. Anti-Nivolumab monoclonal antibody, clone 33H4 (Cat # MAB23098) dilutions start from 10 ug/mL. IC₅₀ = 0.48 ug/mL.

Gene Info — PDCD1

Entrez GeneID [5133](#)

Gene Name PDCD1

Gene Alias CD279, PD1, SLEB2, hPD-1, hPD-I

Gene Description programmed cell death 1

Omim ID [152700 600244](#)

Gene Ontology [Hyperlink](#)

Gene Summary This gene encodes a cell surface membrane protein of the immunoglobulin superfamily. This protein is expressed in pro-B-cells and is thought to play a role in their differentiation. In mice, expression of this gene is induced in the thymus when anti-CD3 antibodies are injected and large number of thymocytes undergo apoptosis. Mice deficient for this gene bred on a BALB/c background developed dilated cardiomyopathy and died from congestive heart failure. These studies suggest that this gene product may also be important in T cell function and contribute to the prevention of autoimmune diseases. [provided by RefSeq]
