

Goat Anti-Golden Syrian hamster IgG (H&L) secondary antibody

Catalog # PAB9230 Size 1 mg

condary antibody was purified using antigen affinity chromatography. Immunogen Golden Syrian hamster IgG whole molecule Host Goat Reactivity Hamster Specificity No reaction was observed against anti-Pepsin or anti-goat IgG F(c). Form Liquid Conjugation Unconjugated Purification This product was prepared from monospecific antiserum by immunoaffinity chromatography, follow d by solid phase adsorption(s) to remove any unwanted reactivities, pepsin digestion and chromatographic separation. Recommend Usage The optimal working dilution should be determined by the end user. Storage Buffer In 20 mM KH ₂ PO ₄ , 150 mM NaCl, pH 7.2 (0.01% sodium azide) Storage Instruction Storage Instruction This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the end user.	Specification	
Reactivity Hamster Specificity No reaction was observed against anti-Pepsin or anti-goat IgG F(c). Form Liquid Conjugation Unconjugated Purification This product was prepared from monospecific antiserum by immunoaffinity chromatography, follow d by solid phase adsorption(s) to remove any unwanted reactivities, pepsin digestion and chromatographic separation. Recommend Usage The optimal working dilution should be determined by the end user. Storage Buffer In 20 mM KH ₂ PO ₄ , 150 mM NaCl, pH 7.2 (0.01% sodium azide) Storage Instruction Store at 4°C. Do not Freeze. Note This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the contains and the poison action at the contains and the	Product Description	Goat anti-Golden Syrian hamster IgG recognizes Golden Syrian hamster IgG whole molecule. This se condary antibody was purified using antigen affinity chromatography.
Reactivity Hamster Specificity No reaction was observed against anti-Pepsin or anti-goat IgG F(c). Form Liquid Conjugation Unconjugated Purification This product was prepared from monospecific antiserum by immunoaffinity chromatography, follow d by solid phase adsorption(s) to remove any unwanted reactivities, pepsin digestion and chromatographic separation. Recommend Usage The optimal working dilution should be determined by the end user. Storage Buffer In 20 mM KH ₂ PO ₄ , 150 mM NaCl, pH 7.2 (0.01% sodium azide) Storage Instruction Store at 4°C. Do not Freeze. Note This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the end user.	Immunogen	Golden Syrian hamster IgG whole molecule
Specificity No reaction was observed against anti-Pepsin or anti-goat IgG F(c). Form Liquid Conjugation Unconjugated Purification This product was prepared from monospecific antiserum by immunoaffinity chromatography, follow d by solid phase adsorption(s) to remove any unwanted reactivities, pepsin digestion and chromatographic separation. Recommend Usage The optimal working dilution should be determined by the end user. Storage Buffer In 20 mM KH ₂ PO ₄ , 150 mM NaCl, pH 7.2 (0.01% sodium azide) Storage Instruction Store at 4°C. Do not Freeze. Note This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the end user.	Host	Goat
Form Liquid Conjugation Unconjugated Purification This product was prepared from monospecific antiserum by immunoaffinity chromatography, followed by solid phase adsorption(s) to remove any unwanted reactivities, pepsin digestion and chromatographic separation. Recommend Usage The optimal working dilution should be determined by the end user. Storage Buffer In 20 mM KH ₂ PO ₄ , 150 mM NaCl, pH 7.2 (0.01% sodium azide) Storage Instruction Store at 4°C. Do not Freeze. Note This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the end user.	Reactivity	Hamster
Conjugation Unconjugated Purification This product was prepared from monospecific antiserum by immunoaffinity chromatography, follow d by solid phase adsorption(s) to remove any unwanted reactivities, pepsin digestion and chromatographic separation. Recommend Usage The optimal working dilution should be determined by the end user. Storage Buffer In 20 mM KH ₂ PO ₄ , 150 mM NaCl, pH 7.2 (0.01% sodium azide) Storage Instruction Store at 4°C. Do not Freeze. Note This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the end user.	Specificity	No reaction was observed against anti-Pepsin or anti-goat lgG F(c).
Purification This product was prepared from monospecific antiserum by immunoaffinity chromatography, follow d by solid phase adsorption(s) to remove any unwanted reactivities, pepsin digestion and chromatographic separation. Recommend Usage The optimal working dilution should be determined by the end user. Storage Buffer In 20 mM KH ₂ PO ₄ , 150 mM NaCl, pH 7.2 (0.01% sodium azide) Storage Instruction Store at 4°C. Do not Freeze. Note This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the end user.	Form	Liquid
d by solid phase adsorption(s) to remove any unwanted reactivities, pepsin digestion and chromator raphic separation. Recommend Usage The optimal working dilution should be determined by the end user. Storage Buffer In 20 mM KH ₂ PO ₄ , 150 mM NaCl, pH 7.2 (0.01% sodium azide) Storage Instruction Store at 4°C. Do not Freeze. Note This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be determined by the end user.	Conjugation	Unconjugated
Storage Buffer In 20 mM KH ₂ PO ₄ , 150 mM NaCl, pH 7.2 (0.01% sodium azide) Storage Instruction Store at 4°C. Do not Freeze. Note This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shows the product contains sodium azide.	Purification	This product was prepared from monospecific antiserum by immunoaffinity chromatography, followe d by solid phase adsorption(s) to remove any unwanted reactivities, pepsin digestion and chromatog raphic separation.
Storage Instruction Store at 4°C. Do not Freeze. Note This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shows the storage in the storage instruction.	Recommend Usage	The optimal working dilution should be determined by the end user.
Note This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shows the state of the sta	Storage Buffer	In 20 mM KH ₂ PO ₄ , 150 mM NaCl, pH 7.2 (0.01% sodium azide)

a so nandou sy udinou dan oniji	Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

- Western Blot
- Immunohistochemistry
- Enzyme-linked Immunoabsorbent Assay
