

Ab™

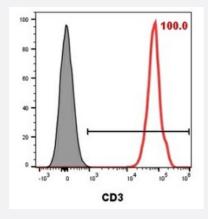

CD3 humanized monoclonal antibody, clone H2L2

Catalog # RAB01069-M01J Siz

HuAb

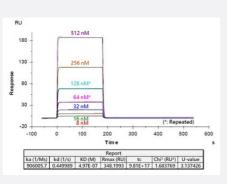

Size 50 ug

Applications

Flow Cytometry

Flow cytometry (transfected cell) analysis of human CD3 T cells were treated with CD3 humanized monoclonal antibody, clone H2L2 (Cat # RAB01069-M01J). This antibody efficiently bound to human CD3 T cells.

Surface Plasmon Resonance

Surface Plasmon Resonance analysis (Biacore Assay) with CD3 humanized monoclonal antibody, clone H2L2 (Cat # RAB01069-M01J).

Specification	
Product Description	Humanized recombinant monoclonal antibody raised against CD3.
Antibody Species	Human
Immunogen	Human CD3E & CD3D Heterodimer Proteins.
Reactivity	Human
Specificity	This antibody recognizes human CD3.

Product Information

Form	Liquid
Purification	Protein A sepharose
lsotype	Human IgG1 with LALAPG mutations in Fc fragment
Storage Buffer	In PBS, pH 7.4
Storage Instruction	Store at -80°C. Aliquot to avoid repeated freezing and thawing.

Applications

• Flow Cytometry

Flow cytometry (transfected cell) analysis of human CD3 T cells were treated with CD3 humanized monoclonal antibody, clone H2L2 (Cat # RAB01069-M01J). This antibody efficiently bound to human CD3 T cells.

• Surface Plasmon Resonance

Surface Plasmon Resonance analysis (Biacore Assay) with CD3 humanized monoclonal antibody, clone H2L2 (Cat # RAB01069-M01J).

Gene Info — CD3D		
Entrez GenelD	<u>915</u>	
GeneBank Accession#	<u>NM_000732.4</u>	
Protein Accession#	<u>NP_000723.1</u>	
Gene Name	CD3D	
Gene Alias	CD3-DELTA, T3D	
Gene Description	CD3d molecule, delta (CD3-TCR complex)	
Omim ID	<u>186790 600802</u>	
Gene Ontology	Hyperlink	

🍟 Abnova	Product Information
Gene Summary	The protein encoded by this gene is part of the T-cell receptor/CD3 complex (TCR/CD3 complex) and is involved in T-cell development and signal transduction. The encoded membrane protein re presents the delta subunit of the CD3 complex, and along with four other CD3 subunits, binds eith er TCR alpha/beta or TCR gamma/delta to form the TCR/CD3 complex on the surface of T-cells. Defects in this gene are a cause of severe combined immunodeficiency autosomal recessive T-c ell-negative/B-cell-positive/NK-cell-positive (SCIDBNK). Two transcript variants encoding different isoforms have been found for this gene. Other variants may also exist, but the full-length natures of their transcripts has yet to be defined. [provided by RefSeq
Other Designations	CD3D antigen, delta polypeptide CD3d antigen, delta polypeptide (TiT3 complex) T-cell receptor T3 delta chain T-cell surface glycoprotein CD3 delta chain
