

RecomAb™

ENO1 recombinant monoclonal antibody

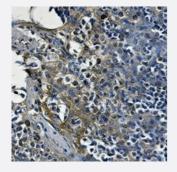

Catalog # RAB02460 Size 100 uL

Applications

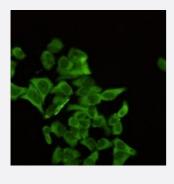

Western Blot (Cell lysate)

Western blot analysis of Jurkat (A), rat brain (B), C6 (C), Hela (D) whole cell lysates with Alpha-enolase recombinant monoclonal antibody (Cat # RAB02460).

Immunohistochemistry (Formalin/PFA-fixed paraffinembedded sections)

Immunohistochemical analysis of human tonsil formalin fixed paraffin embedded tissue section using Alpha-enolase recombinant monoclonal antibody (Cat # RAB02460). The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.117). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Immunofluorescence

Immunofluorescent analysis of HeLa cells with Alpha-enolase recombinant monoclonal antibody (Cat # RAB02460). Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a hidified chamber. Cells were washed with PBST and incubated with a AF488-conjugated secondary antibody (green) in PBS at room temperature in the dark.

Specification	
Product Description	Rabbit recombinant monoclonal antibody raised against human ENO1.
Antibody Species	Rabbit
Immunogen	Original antibody is raised against a synthetic peptide of human ENO1.
Theoretical MW (kDa)	47
Reactivity	Human, Mouse, Rat
Specificity	Recognizes endogenous levels of Alpha-enolase protein.
Form	Liquid
Purification	Immunogen affinity chromatography
Isotype	lgG
Recommend Usage	Immunocytochemistry (1:50-1:100) Immunofluorescence (1:50-1:100) Immunohistochemistry (1:50-1:100) Immunoprecipitation(1:10-1:50) Western Blot (1:500-1:1000) The optimal working dilution should be determined by the end user.
Storage Buffer	In 50mM Tris-Glycine, pH 7.4 (0.15M NaCl, 50% Glycerol, 0.01% Sodium azide and 0.05% BSA)
Storage Instruction	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.
Note	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which shoul d be handled by trained staff only.

Applications

Western Blot (Cell lysate)

Western blot analysis of Jurkat (A), rat brain (B), C6 (C), Hela (D) whole cell lysates with Alpha-enolase recombinant monoclonal antibody (Cat # RAB02460).

• Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunohistochemical analysis of human tonsil formalin fixed paraffin embedded tissue section using Alpha-enolase recombinant monoclonal antibody (Cat # RAB02460). The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.117). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Gene Info — ENO1	
Entrez GenelD	2023
Protein Accession#	P06733
Gene Name	ENO1
Gene Alias	ENO1L1, MBP-1, MPB1, NNE, PPH
Gene Description	enolase 1, (alpha)
Omim ID	172430
Gene Ontology	<u>Hyperlink</u>
Gene Summary	This gene encodes one of three enclase isoenzymes found in mammals; it encodes alpha-enclase, a homodimeric soluble enzyme, and also encodes a shorter monomeric structural lens protein, tau-crystallin. The two proteins are made from the same message. The full length protein, the isoenzyme, is found in the cytoplasm. The shorter protein is produced from an alternative translation start, is localized to the nucleus, and has been found to bind to an element in the c-myc promoter. A pseudogene has been identified that is located on the other arm of the same chromosome. [provided by RefSeq
Other Designations	2-phospho-D-glycerate hydro-lyase MYC promoter-binding protein 1 OTTHUMP0000001706 alp ha enolase like 1 enolase 1 non-neural enolase phosphopyruvate hydratase tau-crystallin

Pathway

- Biosynthesis of alkaloids derived from histidine and purine
- Biosynthesis of alkaloids derived from ornithine
- Biosynthesis of alkaloids derived from shikimate pathway
- Biosynthesis of alkaloids derived from terpenoid and polyketide
- Biosynthesis of phenylpropanoids
- Biosynthesis of plant hormones
- Biosynthesis of terpenoids and steroids
- Glycolysis / Gluconeogenesis
- Metabolic pathways
- RNA degradation

Disease

Myocardial Infarction
