

RecomAb™

CD44 recombinant monoclonal antibody, clone Hermes-1

Catalog # RAB03282 Size 200 ug

Applications

Flow Cytometry

Flow cytometric analysis of human activated T lymphocytes with CD44 recombinant monoclonal antibody, clone Hermes-1 (Cat # RAB03282). Human activated T lymphocytes were stained with an isotype control (3.0-panel A) or the rmeric version of RAB03282 (panel B) at a concentration of 1 ug/ml for 30 mins at RT. After washing- bound antibody was detected using a AF488 conjugated donkey anti-ribody (and cells analysed on a FACSCanto flow-cytometer.

Gene Summary	The protein encoded by this gene is a cell-surface glycoprotein involved in cell-cell interactions, cell adhesion and migration. It is a receptor for hyaluronic acid (HA) and can also interact with other ligands, such as osteopontin, collagens, and matrix metalloproteinases (MMPs). This protein participates in a wide variety of cellular functions including lymphocyte activation, recirculation and homing, hematopoiesis, and tumor metastasis. Transcripts for this gene undergo complex alternative splicing that results in many functionally distinct isoforms, however, the full length nature of some of these variants has not been determined. Alternative splicing is the basis for the structural and functional diversity of this protein, and may be related to tumor metastasis. [provided by RefSeq]
